In the face of the gradual saturation of US public education by the logics of neoliberalism, educators often find themselves at a loss to respond, let alone resist. Through state defunding and many other "reforms" fueled by austerity politics, a majority of educators are becoming casual labor in US universities while those who hang onto secure employment are pressed to act as self-supporting entrepreneurs or do more with less. Focusing on the discipline of writing studies, this collection addresses the sense of crisis that many educators experience in this age of austerity. The chapters in this book chronicle how neoliberal political economy shapes writing assessments, curricula, teacher agency, program administration, and funding distribution. Contributors also focus on how neoliberal political economy dictates the direction of scholarship, because the economic and political agenda shaping the terms of work, the methods of delivery, and the ways of valuing and assessing writing also shape the primary concerns and directions of scholarship. *Composition in the Age of Austerity* offers critical accounts of how the restructuring of higher education is shaping the daily realities of composition programs. The book documents the effects and implications of the current restructuring, examines how cherished rhetorical ideals actually leave the field unprepared to respond effectively to defunding and corporatizing trends, and establishes points of departure for collective response.

### **Achieving Extraordinary Ends: An Essay on Creativity**

Following on from *Writers at Work: The Paragraph* and *Writers at Work: the Short Composition*, *Writers at Work: The Essay* will teach the basics of academic essay writing to intermediate-level students. In *Writers at Work: The Essay*, college and university students use the process approach to write different genres of essays common at the post-secondary level, the most important being expository writing, persuasive writing, and timed essay exams. Each chapter uses the same five-step approach to writing that is used in the two lower-level books. In each chapter, students analyze a model essay, noticing key organizational and linguistic features; brainstorm ideas; write multiple drafts; revise their work; engage in peer reviews; and share their finished work. Chapters recycle and build upon previously taught material.

Writing about sociocultural evolution is always a complicated enterprise, because the subject is not only difficult in a scientific way but also in a political one. In particular since the events of September 11, 2001 the debates about the differences between cultures and their evolutionary developments have left the fields of pure scientific research once and for all. However, there have probably never been scientific discourses that did not touch the realms of political discussions - Darwin, Marx, the atomic physicists and the recent debates about genetic engineering are just a few examples. The aim of this book is not to take part in these debates but it is written as a contribution to the foundations of evolutionary theories in the social sciences. The readers will have to judge if I have succeeded with it. Perhaps essays like this one will help to clarify the problems we all have to face just now in regard to intercultural discourses. Theoretically and mathematically grounded insights into cultural development as the source of many political problems will not solve to how to deal with them immediately but may serve as signposts in the long run.

CREATIVITY HAS become a popular slogan in contemporary education and society. We are urged continually to be creative with respect to all our endeavours - to be creative writers, creative cooks, creative teachers, creative thinkers, creative lovers. Ascribing creativity has become one of the principal means of praising, approving, and commending. Yet in the process of becoming a universal term of positive evaluation, the concept of creativity has tended to lose its connection with its origins. We have forgotten that creativity has to do with creating, that it is connected with great achievements and quality productions. And as a consequence of this lapse of memory, most attempts to foster creativity in educational practice have been misleading at best and dangerous at worst. We have come to settle for the encouragement of certain personality traits at the expense of the encouragement of significant achievement - and this in the name of creativity. If we are not clear about what is meant by creativity, we may end up sacrificing creativity precisely in the process of trying to foster it. This book is an attempt to be clear about creativity. The Context For the poet is an airy thing, a winged and a holy thing; and he cannot make poetry until he becomes inspired and goes out of his senses and no mind is left in him. I Plato If creativity and its growth are to be viewed scientifically, creativity must be defined in a way that permits objective observation and measurement . . .

Michel de Montaigne was one of the most influential figures of the Renaissance, singlehandedly responsible for popularising the essay as a literary form. In 1572, Montaigne retired to his estates in order to devote himself to leisure, reading and reflection. There he wrote his constantly expanding 'essays', inspired by the ideas he found in books from his library and his own experience. He discusses subjects as diverse as war-horses and cannibals, poetry and politics, sex and religion, love and friendship, ecstasy and experience. Above all, Montaigne studied himself to find his own inner nature and that of humanity. The Essays are among the most idiosyncratic and personal works in all literature. An insight into a wise Renaissance mind, they continue to engage, enlighten and entertain modern readers. Born in 1533, Michel de Montaigne studied law and spent a number of years working as a counsellor before devoting his life to reading, writing and reflection. He died in 1586.

The past few years have been very traumatic ones for many Nigerians. With the exception of those in power or close to the seat of power, the changes of 1998 were a welcome relief given the tyranny and repression that the country had suffered under General Abacha. With many people in prison and more in exile, the death of Abacha was received with a sigh of relief. Many observers have seen the resilience that has come to signify the strength and potential of this once 'giant of Africa', as well as the destruction and the socio-political and economic decay of the past decades. The Nigerian people have

endured the exploitation of their rights due to the lack of democratic leadership, and with this in mind, they have been called to attention to fight for their country.

'Dales pointed out that traditional economic and legal solutions to pollution and resource problems were never going to be

satisfactory and that a "third way" was needed. Today, all environmental economists of my generation recognise the debt we owe to Dales's work, as one of the intellectual foundations for emissions trading that began in California in the 1970s and now extends across the world. It is a work of immense influence which deserves reprinting.' - David Pearce, University College London, UK In this classic book, originally published in 1968 by University of Toronto Press, John Dales proposed a new policy instrument for tackling pollution problems, namely 'markets in pollution rights'. Dales was one of the first economists to put forward such a solution, and in subsequent years a system of emissions trading has evolved which is now a centrepiece in international discussions of how to address the problem of global climate change.
