Lonely Planet Jordan

This no-frills survival guide for adventurous budget travelers provides readers with all they need to discover southeast Asia on their own. It's hardly surprising that this is one of the most popular regions for travelers in Asia. Whether visitors are looking for deserted beaches or five-star resorts, jungle adventures, or a hassle-free stopover; there's something for everyone here. Exotic yet bargain value, accessible and full of variety, South East Asia is quite deservedly one of the most popular regions in the world for longer-stay travelers. Travel there is now so easy, that a whole new type of guide is needed: this book fills the gap, concentrating information by offering more maps and less talk. Includes Singapore, Malaysia, Brunei, Thailand, Burma (Myanmar), Yunnan (China), Vietnam, Cambodia, Laos, and nutshell information on Indonesia, East Timor and the Philippines.

Lake Pavin

"She did what? Where?" When I tell people I traveled to Mongolia for a horse race my family and friends struggled to understand. Who can blame them? In early 2018 I was struggling to dissolve the business I shared with a friend and partner. Always striving to be positive, I focused on creating a new solo business and rebranding my blog into The Timid Rider. In starting over, I found the opportunity to travel to Mongolia with The Gobi Desert Cup, an endurance horse race over 480 kilometers in six days and on Mongolian horses. Here I was, a mother of three struggling to build a business for herself. Yet now I had an opportunity to travel across the world for several weeks away from everything and everyone who was important. I don't camp, I don't take normally take risks, and I don't speak Mongolian. Yet, I never doubted for a second that I needed to do this. I knew from the very start this would be a journey of self-discovery. I didn't know it would change my life.

This book represents the first multidisciplinary scientific work on a deep volcanic maar lake in comparison with other similar temperate lakes. The syntheses of the main characteristics of Lake Pavin are, for the first time, set in a firmer footing comparative approach, encompassing regional, national, European and international aquatic science contexts. It is a unique lake because of its permanently anoxic monimolimnion, and furthermore, because of its small surface area, its substantially low human influence, and by the fact that it does not have a river inflow. The book reflects the scientific research done on the general limnology, history, origin, volcanology and geological environment as well as on the geochemistry and biogeochemical cycles. Other chapters focus on the biology and microbial ecology whereas the sedimentology and paleolimnology are also given attention. This volume will be of special interest to researchers and advanced students, primarily in the fields of limnology, biogeochemistry, and aquatic ecology.
