Governance and Public Policy in Canada lays the

foundation for a systematic analysis of policy developments, shaped as they are by multiple players, institutional tensions, and governance legacies. Arguing that provinces are now the most central site of governance and policy innovation, the book assesses the role of the provinces and places the provincial state in its broader economic, institutional, social, and territorial context. The aim throughout is to highlight the crucial role of provinces in policy changes that directly affect the lives of citizens. Three key themes unify this book. First, it addresses the role of policy convergence and divergence among provinces. Although the analysis acknowledges enduring differences in political culture and institutions, it also points to patterns of policy diffusion and convergence in specific areas in a number of provinces. Second, the book explores the push and pull between centralization and decentralization in Canada as it affects intergovernmental relations. Third, it underscores that although the provinces play a greater role in policy development than ever before, they now face a growing tension between their expanding policy ambitions and their capacity to develop, fund, implement, manage, and evaluate policy programs. *Governance and Public Policy in Canada* describes how the provincial state has adapted in the context of these changing circumstances to transcend its limited capacity while engaging with a growing number of civil society actors, policy networks, and intergovernmental bodies.

A smart, research-driven case for why optimism, kindness, and strong social networks will help us live to 100. From the day her daughter was born, science journalist Marta Zaraska fretted about what she and

her family were eating. She fasted, considered adopting the keto diet, and ran a half-marathon. She bought goji berries and chia seeds and ate organic food. But then her research brought her to read countless scientific papers and to interview dozens of experts in various fields of study, including molecular biochemistry, epidemiology and neuroscience. What Marta discovered shattered her long-held beliefs about aging and longevity. A strong support network of family and friends, she learned, lowers mortality risk by about 45 percent, while exercise only lowers it by about 23 percent. Volunteering your free time lowers it by 22 percent or so, while certain health fads like turmeric haven't been shown to help at all. These revelations led Marta Zaraska to a simple conclusion: In addition to healthy nutrition and physical activity, deepening friendships, practicing empathy and contemplating your purpose in life can improve your lifespan. Through eleven chapters that take her around the world, from catching wild mice in the woods of central England to flower arranging with octogenarians in Japan, from laboratories to "hugging centres," Marta embarks on an absorbing, entertaining and insightful journey to determine the habits that will have the greatest impact on our longevity. Deeply researched and expertly reported, *Growing Young* will dramatically change the way you seek a longer, happier life.

Hudson's extraordinary life is proof that even the most downtrodden, luckless person can accomplish the impossible. An intense, fast-paced ride, this book is the unforgettable account of how one man journeyed from seed to sage.

The first book on the media's coverage of race in Canadian politics, it provides an empirical analysis of print media combined with in-depth interviews of elected officials, former candidates, political staffers, and journalists. While there may be few examples of overt racism in newspapers, Erin Tolley reveals how racial assumptions and narratives frame news stories and the experiences of those who enter political life. Evaluation researchers are tasked with providing the evidence to guide programme building and to assess its outcomes. As such, they labour under the highest expectations - bringing independence and objectivity to policy making. They face huge challenges, given the complexity of modern interventions and the politicised backdrop to all of their investigations. They have responded with a huge portfolio of research techniques and, through their professional associations, have set up schemes to establish standards for evaluative inquiry and to accredit evaluation practitioners. A big question remains. Has this monumental effort produced a progressive, cumulative and authoritative body of knowledge that we might think of as evaluation science? This is the question addressed by Ray Pawson in this sequel to *Realistic Evaluation and Evidence-based Policy*. In answer, he provides a detailed blueprint for an evaluation science based on realist principles.

Sayings of a Sage is a modern day anthology of sayings and instructions. Be it witnessing the deaths of hundreds on the battlefields of Iraq, or while traversing through the streets of ghettos across America, many of the sayings, and perhaps some instructions, were composed during the most trying of times. The origin of the material, however, need not be imagined. All came manifestations of experience, yet much of the wisdom and observations could surely have been elaborated and re-expressed by learned scribes of antiquity whom I have studied over the past couple decades. There can be no doubt, however, that Sayings of a Sage is thought provoking literature that wins readers with its compelling portrait of wisdom and inviting them to see life afresh, "wisely," through its wit, originality, and shrewd observation. The primary purpose of the book is to teach wisdom, not only to the young and inexperienced, but to also welcome the older generation into a school of thought often ignored. Wisdom in the ancient Near East was not theoretical knowledge but practical expertise. Jewelers who cut precious stones were wise; kings who made their dominion peaceful and prosperous were wise. Can one not be wise in daily life, too, in knowing how to live and traverse through life without experiencing both peace and trouble in the Creator's omniverse? Ultimately, wisdom, aims at the formation of character and behavior. Sarim the Sage

Most texts on classical social theory offer exhaustive coverage of every possible theorist, making it difficult to use the book in one semester. *Capitalism and Classical Social Theory, Second Edition* represents a departure from this approach by offering solid coverage of the classical triumvirate (Marx, Durkheim, and Weber), but also extending the canon strategically to include Simmel, four early female theorists, and the writings of Du Bois. The result is a manageable, but thorough, examination of the key classical theorists. The second edition has been updated throughout and includes two new chapters: one on Weber and rationalization, and one on Du Bois and his writings on race. A new concluding chapter links classical theory to current developments in capitalism during an age of austerity.
