Advanced Mathematics

Giving your preschooler a great start in math doesn't have to be complicated. Learn how to use fun but purposeful games and activities to give your young child the best possible foundation. Preschool Math at Home will guide you step-by-step as you introduce your preschooler to the world of numbers. Your child will develop a thorough understanding of the numbers up to ten, including: counting comparing and ordering numbers recognizing written numerals beginning addition and subtraction All of the activities are quick and playful, with lots of movement, manipulatives, and games. Each takes less than five minutes, with no special materials needed other than a few household items. Play each game several times for a full year of preschool math curriculum.

Teen Health is the integrated, activities-based health program written especially for middle school students. This sequential, three-course program provides the perfect combination of course material and interactive multimedia resources. Teen Health helps students understand that good health affects their school performance, their friendships, their looks, and their lives. In middle school, life changes quickly. There's more freedom and more peer pressure. Students might be faced with life-changing decisions when they least expect it. That's one reason why

mastering good health skills is so essential during the teen years. Teen Health stretches far beyond traditional health topics to cover the subjects your students really want to know about. It explains the importance of avoiding risky behaviors and provides step-by-step guidelines on how to do so. Course 1 Student Modules . Adolescence: Growing and Changing . Building Character . Conflict Resolution

Saxon Math Intermediate 4

Saxon math programs produce confident students who are not only able to correctly compute, but also to apply concepts to new situations. These materials gently develop concepts, and the practice of those concepts is extended over a considerable period of time. This is called "incremental development and continual review." Material is introduced in easily understandable pieces (increments), allowing students to grasp one facet of a concept before the next one is introduced. Both facets are then practiced together until another one is introduced. This feature is combined with continual review in every lesson throughout the year. Topics are never dropped but are increased in complexity and practiced every day, providing the time required for concepts to become totally familiar. Each grade level has its own consumable meeting book, which is used during The Meeting at the beginning of each day. This first edition meeting book is for Grade 2.
