Mutual understanding and acceptance is perhaps the main challenge of modern society. Diversity is undoubtedly an asset, but cohabiting with people of different backgrounds and ideals calls for a new ethic of responsible intercultural relations, in Europe and in the World. This book tries to answer a series of pertinent and poignant questions arising from these issues, such as whether it is still possible to criticise ideas when this may be considered hurtful to certain religious feelings; whether society is hostage to the excessive sensitivity of certain individuals; or what legal responses there may be to these phenomena, and whether criminal law is the only answer.

Closure is a very quiet place in our hearts and minds where we sometimes search for peace and finality. We often seek closure when tragedy rips at the very core of our heart, forever devastating our lives and the precious lives of our family and friends. We must realize that achieving closure is ours and only ours. It is not in truth the property of the agony that we experience. It is that innate pain that comes from very deep inside us and if we let it, it will surely consume us. Closure is in our heart of hearts and our intelligible understanding of what weve had to endure and why. Please remember, it is not what happens to us, but how we construe what happens to us that will initially determine our emotions, our behaviors, and ultimately our mental state of mind. Nevertheless, if the faith within is not unyielding, sadly most will spend their entire fractured lives in search of it. From my heart to yours, B.R. McCoy

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-

letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Environmental life cycle assessment is often thought of as cradle to grave and therefore as the most complete accounting of the environmental costs and benefits of a product or service. However, as anyone who has done an environmental life cycle assessment knows, existing tools have many problems: data is difficult to assemble and life cycle studies take months of effort. A truly comprehensive analysis is prohibitive, so analysts are often forced to simply ignore many facets of life cycle impacts. But the focus on one aspect of a product or service can result in misleading indications if that aspect is benign while other aspects pollute or are otherwise unsustainable. This book summarizes the EIO-LCA method, explains its use in relation to other life cycle assessment models, and provides sample applications and extensions of the model into novel areas. A final chapter explains the free, easy-to-use software tool available on a companion website.

(www.eiolca.net) The software tool provides a wealth of data, summarizing the current U.S. economy in 500 sectors with information on energy and materials use,

pollution and greenhouse gas discharges, and other attributes like associated occupational deaths and injuries. The joint project of twelve faculty members and over 20 students working together over the past ten years at the Green Design Institute of Carnegie Mellon University, the EIO-LCA has been applied to a wide range of products and services. It will prove useful for research, industry, and in economics, engineering, or interdisciplinary classes in green design.
