Livietta e Tracollo

The faith in science as an ally of political and economic progress, which Franklin and Jefferson made so firm a part of the American tradition, has been undermined by the very success of the scientific revolution. Has science become so powerful that it cannot be controlled by democratic processes? Is the scientific community acquiring a privileged role in government something like that of the ecclesiastical estate in the medieval world? Writing from first-hand experience in government administration and his service on three presidential advisory panels, as well as from extensive research, Don K. Price describes how science and technology have weakened the independence of private corporations and broken down some of the checks and balances on which we have relied for the protection of freedom. In this connection he recounts the recent attempts to set up a national program of oceanographic research, showing that the more advanced the scientific and technological programs are, the more difficult it is to contain them within the normal departmental structure and the more likely they are to bypass the regular lines of responsibility. He then faces the question of whether science is leading us toward some new type of centralized power in which its own processes, rather than those of representative democracy, will determine our policies. He argues, on the contrary, that the more scientific the sciences become, and the more competent to help in the understanding of public issues, the more freedom of choice they provide for responsible politicians. Science can be translated into political decisions only if its knowledge can be mixed with political purpose. This is done through a chain of responsibility that runs from the scientists to the professionals (like engineers and physicians), and on to

administrators and politicians. Within this set of relations, Mr. Price suggests, we are developing a new system of checks and balances. For whether science leads toward tyranny or freedom depends not on a nation's state of technological progress, but on what it believes. The freedom of science owes less to the nineteenth-century ideas of laissez-faire and parliamentary sovereignty than to the older tradition on which the American revolution based its separation of church and state and its federal system. Mr. Price examines the ways in which the President and Congress make use of scientific advice. He sees less reason to fear that authority will be unduly centralized in either the legislative or executive branch, under the American system, than that executive agencies and Congressional committees with common interests in technological programs may acquire power and influence without adequate responsibility.

Written by test-prep specialists, this guide presents you with a complete description of the exam, proven test-taking strategies, and nine full-length practice exams to help you get a higher score on the CompTIA A+ exams. Included are three A+ Essentials (#220-601) exams with 300 questions, two IT Technician (#220-602) exams with 160 questions, two Remote Support (#220-603) exams with 160 questions, and two Depot Technician (#220-604) exams with 160 questions for a total of 780 questions, complete with answers and explanations.

FPGA Prototyping by Verilog Examples

Muhyo has finally woken from his long slumber, but will his prodigious display of power be enough to stop Vector? Moreover, will Muhyo and Roji be able to keep it together when it seems like everything and everyone is threatening to drag the duo apart? -- VIZ Media

The Scientific Estate

Langston Holiday lives with his no-nonsense mother in the gritty public housing projects of Poindexter Village, better known

as "The Vil," after his father abandons them. Without any assistance, his mother is determined to make a man out of Langston—and she's doing a pretty good job. By the end of his senior year, Langston is one of the best high-school basketball players in the nation. That's when he makes the biggest decision of his life: to forgo college and enter the professional ranks. When word hits the streets about Langston's success, his newfound wealth stirs up plenty of envy in the projects, sparking a wave of unthinkable drama and crime. He's being relentlessly pursued by Toy Daniels, a has-been athlete who's determined to sign Langston to his newly formed sports agency. Langston's best friend, Jalen, becomes involved in shady dealings with people who are known for nothing but trouble, and his girlfriend, Tori, is quickly becoming fed up with Langston's wandering ways. Suddenly, Langston doesn't know who he can trust. This gripping novel from bestselling author Franklin White realistically depicts the pitfalls of basketball stardom, when large amounts of money fall into the hands of people who've never known anything but poverty and struggle.

The Numbers Game

FPGA Prototyping Using Verilog Examples will provide you with a hands-on introduction to Verilog synthesis and FPGA programming through a “learn by doing” approach. By following the clear, easy-to-understand templates for code development and the numerous practical examples, you can quickly develop and simulate a sophisticated digital circuit, realize it on a prototyping device, and verify the operation of its physical implementation. This introductory text that will provide you with a solid foundation, instill confidence with rigorous examples for complex systems and prepare you for future development tasks.

Learning Scientific Programming with Python

Cole just wants to play football but he can't even get off the bench! Seventh-grade running back Cole Patterson is sure he could make big plays for the Oak Valley Middle School Mustangs, but the coach won't even put him into the game—and the coach is his dad! Now star linebacker Jack Riley is saying Cole wouldn't even be on the team if his dad wasn't the coach. When Cole finally gets his chance to prove Jack wrong, will he take it? Or will he do what's best for the team?

This volume focuses on the distinct character of Judaic thought concerning moral value, the individual human being, the nature of political order, relations between human beings, and between human beings and God. The work of ten scholars, it draws on moral philosophy, philosophy of religion, ethics, Jewish intellectual history, and theology.

Playing Easy to Get

This series provides a skills-rich, inquiry-based approach to engage students of all abilities, and is the only resource on the market written for the new Queensland Senior Geography Syllabus. Perfectly aligned with the new senior Geography Syllabus and containing new local, regional and global case studies and data, this series will help to build students' confidence responding to unseen data and demonstrating their understanding of geographical concepts.

Muhyo & Roji's Bureau of Supernatural Investigation, Vol. 1

****New Adult Romance**** Needing an escape from her past, Avery chooses a college where no one knows her. Keeping a low profile was the plan, falling for the intense frat boy, Jase wasn't. Yet she can't deny how alive she feels when he's near. Even as common sense implores her to stay away, her body begs her to get closer. Jase, numb from his own family drama, has grown bored with weekends fueled by nameless girls and countless bottles when he meets Avery. Helping her cope with her past is better than dealing with the bullshit his own life's served up. Determined to drive away the painful secret she's guarding, he appoints himself her life coach, and challenges her to new experiences. Getting close to her and being the one to make her smile are simply perks of the job. But when Avery's past boldly saunters in, refusing to be forgotten, can Jase live with the truth about the girl he's fallen for? Recommended for 17+ due to mature themes and sexual content.

CliffsTestPrep CompTIA A+

Together with Yoichi and Biko, Muhyo attempts to form a pact with the great underlord Pluto himself! Meanwhile, Roji and his classmates weather Executor Page's new-and-improved testing camp but a marauding spirit wasn't part of the plan! Will Muhyo and Roji be able to overcome their separate challenges? -- VIZ Media

Muhyo & Roji's Bureau of Supernatural Investigation, Vol. 7

All it took was one disastrous event to send Mya's happy life spiraling out of control, and into complete and utter chaos. Her disgraceful fall from wifey to side chick left her bitter, and with a mindset that even she was ashamed of. But what happens when things get old and you're finally fed up? Do you try to get away and move on, or is it too late due to the slew of bad decisions that you've already made? When it comes to Nano, he selfishly wants his cake and eat it too. Having multiple women was fun at first, but things get out of hand fast, and he's left with an extremely hard decision to make. Do you choose the one you love or the one you like? Law has been betrayed in the worst way by a woman he loved to no end. A chance encounter with Mya, whose night was equally as bad, ends up being the greatest one night stand he had ever had. Unbeknownst to him, she left without a word, and he doesn't run into her again until years later. However, the sweet, broken hearted, vulnerable woman he once knew was no more. To Say That We're In Love Could Be Dangerous when you're caught between your past and your present.

First Round Lottery Pick

Richard De Veaux, Paul Velleman, and David Bock wrote Intro Stats with the goal that you have as much fun reading it as they did in writing it. Maintaining a conversational, humorous, and informal writing style, this new edition engages readers from the first page. The authors focus on statistical thinking throughout the text and rely on technology for calculations. As a result, students can focus on developing their conceptual understanding. Innovative Think/Show/Tell examples provide a problem-solving framework and, more importantly, a way to think through any statistics problem and present their results. New to the Fourth Edition is a streamlined presentation that keeps students focused on what's most important, while including out helpful features. An updated organization divides chapters into sections, with specific learning objectives to keep students on track. A detailed table of contents assists with navigation through this new layout. Single-concept exercises complement the existing mid- to hard-level exercises for basic skill development.

Put Me In, Coach!

A “cinematic . . . page-turner and a passionate analysis of faith, memory, responsibility, and consequence.”—Molly Antopol, Fiction Writers Review Inspired by and structured around the chamber piece of the same title by the French composer Olivier Messiaen, *Quartet for the End of Time* is a mesmerizing story of four lives irrevocably linked in a single act of betrayal. The novel takes us on an unforgettable journey beginning during the 1930s Bonus Army riots, when World War I veteran Arthur Sinclair is falsely accused of conspiracy and then disappears. His absence will haunt his son, Douglas, as well as Alden and Sutton Kelly, the children of a powerful U.S. congressman, as they experience—each in different ways—the dynamic political social changes that took place leading up to and during World War II. From the New Deal projects through which Douglas, newly fatherless, makes his living to Sutton's work as a journalist, to Alden's life as a code breaker and a

spy, each character is haunted by the past and is searching for love, hope, and redemption in a world torn apart by chaos and war. Through the lives of these characters, as well as those of their lovers, friends, and enemies, the novel transports us from the Siberian Expedition of World War I to the underground world of a Soviet spy in the 1920s and 1930s, to the occultist circle of P. D. Ouspensky and London during the Blitz, to the German prison camp where Messiaen originally composed and performed his famous Quartet for the End of Time. At every turn, this rich and ambitious novel tells some of the less well-known stories of twentieth-century history with epic scope and astonishing power, revealing at every turn the ways in which history and memory tend to follow us, and in which absence has a palpable presence.

Muhyo & Roji's Bureau of Supernatural Investigation, Vol. 3

Intro Stats

I can read you like a book: how to spot the messages and emotions people are really sending with their body language.

Redwing's Lady (Mills & Boon Vintage Cherish)

This book is a compendium of many of the statistical tools and tests used by quality and engineering professionals. it is a practical handbook that lists significant statistical methods, outlines assumptions for testing, and provides formulas and completed examples. the book is ideal for engineers who know what type of test to perform but need an easy-to-use reference to help complete the task. Readers should have an understanding of basic statistics. a bibliography contains references to texts that can provide the necessary theory and mathematical foundations.

The Accidental Life of Jessie Jefferson

Muhyo and his friends reach the bottom level of the prison Arcanum, where Face-Ripper Sophie awaits in disguise. Our heroes must locate the real Sophie, but they'd better find her before she gets to them first! -- VIZ Media

Numbers saturate the news, politics, and life. The average person can use basic knowledge and common sense to put the never-ending onslaught of facts and figures in their proper place.

Quality Engineering Statistics

This fast-paced introduction to Python moves from the basics to advanced concepts, enabling readers to gain proficiency quickly.

Scientific Parallel Computing

From Sunday Times bestselling author Paige Toon comes the first novel in a witty new series, perfect for fans of Geek Girl and Girl Online! Meet Jessie, small-town girl turned wild child... Jessie has never known her real dad, and when her mum dies she thinks any hope of finding him is gone. As she goes off the rails and her life devolves into a wild mess, her stepdad announces that her father is Johnny Jefferson—legendary rock star and former hell-raiser. Still dealing with her loss, and now the daughter of a superstar, Jessie is sucked into the LA lifestyle—paparazzi, parties, and hot guitar-wielding boys included. But is Johnny up to the job of fatherhood? And, more importantly, is Jessie ready for life in the spotlight? “Fun and flirty, Jessie Jefferson is a top-notch series YA fans should grab ASAP.” —Maximum Pop!

Africa Zero

From modelling financial markets to global weather patterns, parallel computing enables computations beyond the reach of sequential methods. This text integrates all the fundamentals of parallel computing while also providing a basis for a deeper understanding of the subject.

I Can Read You Like a Book

Muhyo's friend Biko has a big problem. One of Biko's magic locks has been broken, and now something's escaped from the bottom level of a top-security prison for the vilest, most dangerous ghosts. It's up to Muhyo and Roji to restore order, but what will they do when their greatest fears are realized? -- VIZ Media

Historical Dictionary of Vietnam

Algebra 1/2

Science is increasingly defined by multidimensional collaborative networks. Despite the unprecedented growth of scientific

collaboration around the globe – the collaborative turn – geography still matters for the cognitive enterprise. This book explores how geography conditions scientific collaboration and how collaboration affects the spatiality of science. This book offers a complex analysis of the spatial aspects of scientific collaboration, addressing the topic at a number of levels: individual, organizational, urban, regional, national, and international. Spatial patterns of scientific collaboration are analysed along with their determinants and consequences. By combining a vast array of approaches, concepts, and methodologies, the volume offers a comprehensive theoretical framework for the geography of scientific collaboration. The examples of scientific collaboration policy discussed in the book are taken from the European Union, the United States, and China. Through a number of case studies the authors analyse the background, development and evaluation of these policies. This book will be of interest to researchers in diverse disciplines such as regional studies, scientometrics, R&D policy, socio-economic geography and network analysis. It will also be of interest to policymakers, and to managers of research organisations.

To Say We're in Love Could Be Dangerous

She eventually learns that her man died months ago. That same night, she finds Andres making his escape. She leads him to a ruined village where an old woman gives them shelter. With Tamia's care, Andres gradually recovers, and a strong bond grows between them. Later, the couple have an affair and take refuge in the city with Tamia's family. Andres' terrorist past comes to light while Tamia discovers the unbelievable truth about her dead lover.

Lost Bodies

A companion prayer book to 99 Stories from the Bible with delightful illustrations in a strong vibrant style, and prayers for all occasions. The prayers are a combination of traditional and modern (by Juliet David), and provide an introduction to family prayer time with young children, bringing talking to God to life in the heart of every child.

The Geography of Scientific Collaboration

The Gunsmith has never been one to back away from a friendly wager. So when a friend challenges him to earn a living as a gambler. Clint figures it's a good chance to work on his poker game—and stay out of trouble. He sets out for Chinaville, Colorado, where a nearby gold strike has the miners pouring into town to lose their money at cards. Clint has no problem winning at the tables, but a miner accuses him of cheating. And when the sore loser turns up with a back full of lead, Clint finds three vengeful brothers and a hardcase cousin drawing a bead on him. Clint is no backshooter, but these boys don't want to listen to reason. The gambling life sure isn't turning out peaceful. But life never was peaceful for the Gunsmith

Judaic Sources and Western Thought

At the end of 1912 Jacques Schneider announced his intention of presenting an annual trophy for an international seaplane contest. There were only twelve Schneider contests but they were major international events with the major rivals being Britain and Italy, followed by France and the US. Biplane seaplanes and flying-boats predominated the early contests and some very advanced twin-float biplanes were among the winners as late as 1925. However, it was the monoplane which was to become the symbol of Schneider Trophy, with Supermarine and Macchi designs reaching the peak of racing seaplane performance. The final winning combination of Supermarine airframe and Rolls-Royce engine was to make a vital contribution to Britain's defence in 1940 in the form of the Rolls-Royce powered Hurricane and Spitfire. This book records the contests and, in considerable detail, the design, development and achievements of the participating aircraft; those which failed to take part; and the projects, some of which embodied very advanced ideas even if they were proved to be unrealistic.

Muhyo & Roji's Bureau of Supernatural Investigation, Vol. 11

New York Times bestselling author Sherrilyn Kenyon and rising stars Jaid Black and Kresley Cole unlock the pleasures and perils of embracing the boldest and most powerful of lovers -- 100% alpha males -- in three sensually erotic tales. Discover the physical rapture of his muscular arms. Become a prisoner of passion, swept away by an encounter with his primal side. And get lost in the all-consuming thrill of white-hot pursuit by a relentless stranger who may be your most dangerous foe, the best lover you've ever had -- or both. Let your fantasies run wild with these unforgettable novellas where bigger is most definitely better -- and playing easy-to-get is the only way to go!
