#### **Excel 2002 - Complete**

The Advantage Series presents the Feature-Method-Practice approach to computer software applications to today's technology and business students. This series implements an efficient and effective learning model, which enhances critical thinking skills and provides students and faculty with complete application coverage. The primary market is the Introduction to Computing/CIS computer literacy course requiring a lab component that covers software applications. Other course areas include Adult and Continuing Education/Individual Application courses, which are one-credit hour, designed to provide a brief introduction to a single software application.

### **Exam Prep for Microsoft Office 2013; A Skills Approach with SIMnet Access Card**

The Advantage Series presents the Feature-Method-Practice approach to computer software applications to today's technology and business students. This series implements an efficient and effective learning model, which enhances critical thinking skills and provides students and faculty with complete application coverage.

## **Microsoft Excel 2002**

### **Exam Prep for: GEN COMBO M:INFORMATION SYSTEMS; CONNECT AC;**

### **Exam Prep for Microsoft ® Access 2013; A Skills Approach with SIMnet Access Card**

An introduction to Windows XP, which seeks to enhance critical thinking skills and provide students with complete application coverage. There are Feature, Method and Practice boxes to prepare students for skills assessment, and end-of-chapter exercises and reviews.

## **Word 2002 Introductory**

The problem under investigation was the evaluation of virtual simulations to combat effectiveness for two separate populations: US Army heavy combat units returning from Operation Iraqi Freedom and US Army National Guard heavy combat units. The research used opinion data collected via questionnaires delivered to battalion through platoon leadership. Questionnaires were delivered via physical interviews and written survey and also through web delivered surveys. Individual opinions were aggregated based upon duty position and other demographic factors to develop collective opinions which allowed analysts to make supported observations. Results are reported separately for Iraqi Freedom units and National Guard units, Significant findings include: virtual simulations are effective but are seen as a substitute to live training; users would prefer higher operational area modeling in virtual trainers so they can use them more as theater/mission rehearsal tools; and integration of virtual simulations into unit training strategies is a learned skill and requires more attention. Finally this research demonstrates the viability of using web-based collection methods in further investigations.

The I-Series Applications textbooks strongly emphasize that students learn and master applications skills by being actively engaged- by doing. These texts have been written with clear, error-free, and unambiguous steps to accomplish tasks that lead to a finished document, worksheet or database table. The authors made the decision that teaching "how" to accomplish some task is not enough for complete understanding and mastery. Prior to introducing steps, the authors discuss why the steps students are about to experience are important and what

role the steps play in the overall plan for creating a document, workbook or database.
