Desert Diary

The former director of communications at Harley-Davidson and one of the most sought-after speakers in the world reveals his exhilarating, innovative approach to creating customer loyalty and marketplace dominance. Ken Schmidt is a wanted man. His role in transforming Harley-Davidson Motor Company—one of the most celebrated corporate success stories in history—led business leaders all over the world to seek his guidance. After all, how many companies can get their customers to tattoo their logo on their arms? After having worked with more than one thousand companies worldwide, Schmidt is ready to share the secrets that spurred Harley-Davidson’s remarkable turnaround. An avid motorcycle enthusiast, Schmidt harnessed his passion for riding to create his famed Noise Cubed Trilogy—the three questions he asks every one of his clients. They assess a company’s positioning, competitiveness, and reputation, and are the key ingredients for any successful corporation: What do the customers your business served yesterday say about your business when they’re talking about you to prospective customers? What do you want them to say? What are you doing to get them to say it? In *Make Some Noise*, Schmidt shares his full-throttle approach for businesses and individuals alike. Anyone looking to become more competitive and grow customer loyalty can learn from the case studies and experiences he shares. From a nondescript heavy construction company, to the most high-end “luxury” gas station in America, to Apple, and to his own personal landscaper, Schmidt illustrates how the answers to

She wants to dive off cliffs and go swimming with her brother Peter and cousin Rupert. And more than anything, she wants an education. She helps Peter with his homework all the time, so why can’t she manage it by herself? When war breaks out, Clarry is shocked to find that Rupert has enlisted. The Moon Dragon (The Secrets of Droon #26)

Zombies, radioactive meatloaf, baseball, math, chainsaws. Welcome to Zombie Elementary. Larry Mullet is your typical fourth grader. He's not the biggest kid or the smartest kid or the best looking kid. He rides his bike, plays baseball, takes the school bus, avoids cafeteria food, and--oh yeah, he's a zombie hunting expert. Larry was just doing his usual thing when Alex Bates from Ms Hoag's class tried to eat him. Sadly, that was only the beginning. Something odd was going on at Brooks Elementary and it was up to Larry and his friends to take charge (for some reason). Hilariously told interview-style as a record of the REAL story, and peppered with zombie tips and facts, zombie cheerleaders and plenty of gore, this book will be a surefire hit for anyone interested in a ghoulishly good life-or-death comedy.

Hyrule Warriors

A FINANCIAL TIMES BOOK OF THE MONTH FROM THE WALL STREET JOURNAL:
"Nothing Mr. Gilder says or writes is ever delivered at anything less than the fullest philosophical decibel Mr. Gilder sounds less like a tech guru than a poet, and his words tumble out in a romantic cascade." "Google's algorithms assume the world's future is nothing more than the next moment in a random process. George Gilder shows how deep this assumption goes, what motivates people to make it, and why it's wrong: the future depends on human action." — Peter Thiel, founder of PayPal and Palantir Technologies and author of *Zero to One: Notes on Startups, or How to Build the Future* The Age of Google, built on big data and machine intelligence, has been an awesome era. But it's coming to an end. In *Life after Google*, George Gilder—the peerless visionary of technology and culture—explains why Silicon Valley is suffering a nervous breakdown and what to expect as the post-Google age dawns. Google's astonishing ability to "search and sort" attracts the entire world to

its search engine and countless other goodies—videos, maps, email, calendars....And everything it offers is free, or so it seems. Instead of paying directly, users submit to advertising. The system of “aggregate and advertise” works—for a while—if you control an empire of data centers, but a market without prices strangles entrepreneurship and turns the Internet into a wasteland of ads. The crisis is not just economic. Even as advances in artificial intelligence induce delusions of omnipotence and transcendence, Silicon Valley has pretty much given up on security. The Internet firewalls supposedly protecting all those passwords and personal information have proved hopelessly permeable. The crisis cannot be solved within the current computer and network architecture. The future lies with the “cryptocosm”—the new architecture of the blockchain and its derivatives. Enabling cryptocurrencies such as bitcoin and ether, NEO and Hashgraph, it will provide the Internet a secure global payments system, ending the aggregate-and-advertise Age of Google. Silicon Valley, long dominated by a few giants, faces a “great unbundling,” which will disperse computer power and commerce and transform the economy and the Internet. Life after Google is almost here. For fans of "Wealth and Poverty," "Knowledge and Power," and "The Scandal of Money."
