Memory Detection

A childhood biography of a groundbreaking African-American athlete. Arthur Ashe (1943-1993) was the first African American man to win a major tennis tournament. He did not start out with a love of the game--his favorite sport was actually

baseball--but growing up in the racist south, Arthur decided he would one day play sports on courts that did not allow black athletes. After proving himself a natural on the tennis court, and struggling with committing to the game, Arthur enjoyed many years of championship tennis, crowned by two achievements: his victory over Jimmy Connors at Wimbledon, and competing in Byrd Park, Virginia, a park he was not allowed to play in when he was a child. Alas, during heart surgery in 1983, it is likely that Ashe was given blood tainted with HIV. He became an active fundraiser and speaker on behalf of AIDS research. In 1997 the U.S. Tennis Center's main stadium in New York City was named Arthur Ashe Stadium in honor of his many contributions to the game. This inspiring biography showcases Ashe's courage in the face of bigotry.

The Great Shame

Known for accuracy, precision, and rigor, Soo Tan now brings those same qualities to the Calculus course. With his clear, concise writing style, and use of relevant, real world examples, Tan introduces abstract mathematical concepts with his intuitive approach that captures student interest without compromising mathematical rigor. In keeping with this emphasis on conceptual understanding, each exercise set begins with concept questions and each end-of-chapter review section includes fill-in-the-blank questions which help students master the definitions and theorems in each chapter. Additionally, many questions asking for the interpretation of graphical, numerical, and algebraic results are included among both the examples and the exercise sets. Calculus: Early Transcendentals

In this book, Nicolas Van de Walle identifies 26 countries that are extremely poor and grew little if at all in the 1990s. His sample excludes North Korea and countries where civil war explains some of their failure to grow (Afghanistan, Sierra Leone, Sudan, Tajikistan and others). The 26 countries have limited infrastructure and human capital and the small size of their markets deter private savings and investment. Aid was meant to help overcome these problems, and these countries received a lot. Yet they have failed to grow. What is wrong? Is foreign aid a solution or part of the problem? What changes might make aid more effective? Given these countries require the financial and technical resources of the West, why haven't aid programs made a difference? Van de Walle blames their economic failure mostly on the venality and incompetence of their political leadership. He analyzes the contradictions and tensions faced by the aid community in poorly run countries, providing a sobering analysis of the perverse effects of aid where the politics is all wrong. Too often, resources provided by foreign aid keep the wrong government in office, and undermine adoption of economic as well as political reforms. Bad government combined with aid, in short, hurts poor countries - and particularly the poorest people in those countries. Despite good intentions, little progress has been made in implementing announced "reforms" of the aid business itself. A constituency for reform is lacking, in the donor countries and in the recipient countries, where those in power benefit from the status quo.

Overcoming Stagnation in Aid-dependent Countries

Master storyteller Sonya Hartnett crafts a magical and moving fable about war and redemption . . . and what it means to be free. When the Germans attack their Romany encampment during World War II, Andrej and his younger brother, Tomas, flee through a ravaged countryside under cover of darkness, guarding a secret bundle. Their journey leads to a bombed-out town, where the boys discover a hidden wonder: a zoo filled with creatures in need of hope. Like Andrej and Tomas, the animals--wolf and eagle, monkey and bear, lioness and seal, kangaroo and llama-- have stories to share and a mission to reclaim their lives.

In the 19th century the Irish population was halved. This masterly book traces the three causes of this depletion; first the manine, second the Irish diaspora and the emigrations to places such as America and Canada and thridly the transportations of political activists to Australia. It is a quest for Keneally's Irish ancestors. Based on unique research among little-used sources, the characters and their stories

come brilliantly to life; this is an important book in which the main political themes are fascinatingly explored. It also contains a remarkable collection of photographs and documents.

Noble Savages

In the late nineteenth and early twentieth centuries, working-class Americans had eating habits that were distinctly shaped by jobs, families, neighborhoods, and the tools, utilities, and size of their kitchens—along with their cultural heritage. *How the Other Half Ate* is a deep exploration by historian and lecturer Katherine Turner that delivers an unprecedented and thoroughly researched study of the changing food landscape in American working-class families from industrialization through the 1950s. Relevant to readers across a range of disciplines—history, economics, sociology, urban studies, women's studies, and food studies—this work fills an important gap in historical literature by illustrating how families experienced food and cooking during the so-called age of abundance. Turner delivers an engaging portrait that shows how America's working class, in a multitude of ways, has shaped the foods we eat today.

Old Magazines, Second Edition, will delight both collectors and dealers. Author Richard E. Clear has 30 years of experience dealing in periodicals, and wrote his first book on magazines in 1974. Magazines from many different areas are included: movie, trade, fashion, farm, sports, and more, and over 300 new color photos have been added to this edition, representing the thousands of magazines available. The book focuses on the more common, easily recognized and attainable copies rather than rare issues. Each listing includes information such as title, size, volume, publisher, dates published, all known names of the magazine, and a realistic market value. Because old magazines often span large periods and appear in literally thousands of issues, Clear gives criteria for spotting the more valuable issues. Included in this new edition is a list of illustrators with information about

where to find their work, a suggested grading guide, a list of paper dolls by name and where they can be found, and a ten-page section on advertisements.

You Can Change Your Destiny

Traditional techniques for detecting deception, such as the 'lie-detector test' (or polygraph), are based upon the idea that lying is associated with stress. However, it is possible that people telling the truth will experience stress, whereas not all liars will. Because of this, the validity of such methods is questionable. As an alternative, a knowledge-based approach known as the 'Concealed Information Test' has been developed which investigates whether the examinee recognizes secret information - for example a crime suspect recognizing critical crime details that only the culprit could know. The Concealed Information Test has been supported by decades of research, and is used widely in Japan. This is the first book to focus on this exciting approach and will be of interest to law enforcement agencies and academics and professionals in psychology, criminology, policing and law.

The First 50 Pages

At some point in every person's life, we will need a miracle from God. It may be for us, a family member, or a troubled child. It might be a mountain of family or financial trouble, or some unseen force that fills us with fear. The late John Osteen has good news for us. We can have a miracle from God, for God is a miracle worker. And He has recorded many of His miracles in His Word, the Bible. Rather than running around searching for needed miracles, Osteen shows us how to put the power of God's Word into daily practice. When we agree with, believe in, and confess the Word of God, miracles reveal themselves.

How the Other Half Ate

At 16, Madison has accepted herself for who she is: smart and witty, but overweight with thick glasses and the social life of a Tibetan monk. Everything changes the summer before her junior year of high school when her eyesight inexplicably corrects itself, and she begins to rapidly lose weight. However, her new look comes with an unexpectedly expensive price. Madison's first kiss with the boy she has had a crush on for years triggers powers she can't control, almost killing him. She discovers she is a Berserker, a powerful being chosen to guard the world from the Havocs, ancient creatures brought into our world by magic thousands of years ago. They cause destruction and death, but cannot be killed. Only the Berserkers' life-blood can bind - and free - the Havocs. One Havoc is free and wants Madison's blood to free another. Instead of enjoying her new look and popularity at school, Madison must now work with the Berserkers to master her powers and bind the Havoc before it kills her. Oh, and if that weren't bad enough, it turns out she is the first female Berserker since, well - ever.

Yanomami raises questions central to the field of anthropology - questions concerning the practice of fieldwork, the production of knowledge, and anthropology's intellectual and ethical vision of itself. Using the Yanomami controversy - one of anthropology's most famous and explosive imbroglios - as its starting point, this book considers how fieldwork is done, how professional credibility and integrity are maintained, and how the discipline might change to address central theoretical and methodological problems. Both the most up-to-date and thorough public discussion of the Yanomami controversy.
