The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the

international scientific community.

From Victor Frankenstein to Lex Luthor, from Dr. Moreau to Dr. Doom, readers have long been fascinated by insane plans for world domination and the madmen who devise them. Typically, we see these villains through the eyes of good guys. This anthology, however, explores the world of mad scientists and evil geniuses—from their own wonderfully twisted point of view. An all-star roster of bestselling authors—including Diana Gabaldon, Daniel Wilson, Austin Grossman, Naomi Novik, and Seanan McGuire—twenty-two great storytellers all told—have produced a fabulous assortment of stories guaranteed to provide readers with hour after hour of high-octane entertainment born of the most megalomaniacal mayhem imaginable. Everybody loves villains. They're bad; they always stir the

pot; they're much more fun than the good guys, even if we want to see the good guys win. Their fiendish schemes, maniacal laughter, and limitless ambition are legendary, but what lies behind those crazy eyes and wicked grins? How—and why—do they commit these nefarious deeds? And why are they so set on taking over the world? If you've ever asked yourself any of these questions, you're in luck: It's finally time for the madmen's side of the story.
