building, leveraging, identifying and measuring, and protecting brands. Filled with the latest cutting-edge research, students will learn how to design strategies and tactics to effectively build and manage brands.

Branded

Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, the Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science. This volume includes the full proceedings from the 2013 Academy of Marketing Science (AMS) Annual Conference held in Monterey, California, entitled Ideas in Marketing: Finding the New and Polishing the Old.

Stories are orders of magnitude which are more effective than facts at achieving attention,

persuading, being remembered, and inspiring involvement. Signature stories—intriguing, authentic, and involving narratives—apply the power of stories to communicate a strategic message. Marketing professionals, coping with the digital revolution and the need to have their strategic message heard internally and externally, are realizing that a digital strategy revolves around content and that content is stories. *Creating Signature Stories* shows organizations how to introduce storytelling into their strategic messaging, and guides organizations to find, or even create, signature stories and leverage them over time. With case studies built into every chapter, organizations will realize the power of storytelling to energize readers, gain visibility, persuade audiences, and inspire action.

Strategic Brand Management

An Ingredient Brand is exactly what the name implies: an ingredient or component of a product that has its own brand identity. This is the first comprehensive book that explains how Ingredient Branding works and how brand managers can successfully improve the performance of component marketing. The authors have examined more than one hundred examples, analyzed four industries and developed nine detailed case studies to demonstrate the viability of this marketing innovation. The new concepts and principles can easily be applied by professionals. In the light of the success stories of Intel, GoreTex, Dolby, TetraPak, Shimano, and Teflon it can be expected that component suppliers will increasingly

use Ingredient Branding strategies in the future.

Managing Brand Equity

Strategic Brand Management approaches the subject of brand management from a unique socio-cultural perspective, providing students with an understanding of the dynamics of the subject and enabling them to engage with the issues that lie within. While adopting this innovative framework, the book also integrates more traditional notions of the brand in terms of equity and positioning within that framework. Building on a solid theoretical underpinning, this textbook provides a rigorous grounding in the subject of brand management. The theory is applied to examples throughout, to enable students to understand the practical application. The framework for the book separates a brand's concept into functional and emotional parts, looking at purchases that fulfil a functional need and how these develop into emotional decision-making processes.

Kellogg on Branding in a Hyper-Connected World

Consumer behaviour has an increasing impact on business decisions through various individual and environmental factors. This phenomenon can be observed through the different buying patterns of generations and cultures when acquiring products and services. The study of consumer behaviour provides insight into consumer information processing, decision making and consumption patterns and is, therefore, critical to marketing planning and strategies, public policy and ethics. This fascinating subject also helps us understand our own consumer patterns: when, why and where we buy certain items, why we use them in certain ways, and how we dispose of them. Consumer behaviour is an essential component of both marketing and industrial

psychology courses.

Creating Signature Stories

In *Strategic Brand Management*, Alexander Chernev, professor of marketing at the renowned Kellogg School of Management at Northwestern University, lays out a systematic approach to understanding the key principles of building enduring brands. This book presents a cohesive framework for brand management that delineates the unique role of brands as a means of creating market value. Topics covered include developing a meaningful value proposition, designing brand attributes, developing an impactful brand communication campaign, managing brand portfolios, cobranding, brand repositioning and realignment, managing brand extensions, measuring brand impact, the legal aspects of protecting the brand, and developing a strategic brand management plan. Clear, succinct, and practical, *Strategic Brand Management* is the definitive text on building strong brands.

positioning concepts with 21st century digital strategies, tools, and practices. Grams presents great new ways to collaboratively uncover, communicate, and evolve your ideal brand position, embed it in organizational culture, and work with your brand community to make it come to life. This step-by-step guide will lead you through the entire brand positioning process, while providing all you need to build a winning brand on a tight budget!

Brand Equity & Advertising

The most important assets of any business are intangible: its company name, brands, symbols, and slogans, and their underlying associations, perceived quality, name awareness, customer base, and proprietary resources such as patents, trademarks, and channel relationships. These assets, which comprise brand equity, are a primary source of competitive advantage and future earnings, contends David Aaker, a national authority on branding. Yet, research shows that managers cannot identify with confidence their brand associations, levels of consumer awareness, or degree of customer loyalty. Moreover in the last decade, managers desperate for short-term financial results have often unwittingly damaged their brands through price promotions and unwise brand extensions, causing irreversible deterioration of the value of the brand name. Although several companies, such as Canada Dry and Colgate-Palmolive, have recently created an equity management position to be guardian of the value of brand names, far too few managers, Aaker concludes,

Online Library Strategic Brand Management Keller 4th Edition

really understand the concept of brand equity and how it must be implemented. In a fascinating and insightful examination of the phenomenon of brand equity, Aaker provides a clear and well-defined structure of the relationship between a brand and its symbol and slogan, as well as each of the five underlying assets, which will clarify for managers exactly how brand equity does contribute value. The author opens each chapter with a historical analysis of either the success or failure of a particular company's attempt at building brand equity: the fascinating Ivory soap story; the transformation of Datsun to Nissan; the decline of Schlitz beer; the making of the Ford Taurus; and others. Finally, citing examples from many other companies, Aaker shows how to avoid the temptation to place short-term performance before the health of the brand and, instead, to manage brands strategically by creating, developing, and exploiting each of the five assets in turn

Creating Powerful Brands

Although research on business model innovation is flourishing internationally, many important questions on the 'how', 'what', and 'when' of this process remain largely unanswered, particularly in regard to the role of top management. This book answers some of those pressing questions by taking a deliberately managerial perspective. Based on new and original findings derived from a survey among firms from various industries, and several case studies (including DSM, NXP Semiconductors, Randstad, and TomTom), the authors provide new insights into how and when managers can change a firm's business model. They turn their attention particularly to one key question: is it better to replicate existing models or develop new

Online Library Strategic Brand Management Keller 4th Edition

ones? Business model renewal is regarded as being especially vital in highly competitive environments. Nonetheless, whatever the environment, high levels of both replication and renewal will be key for a firm to succeed. The book looks at four levers that can be used by managers to innovate their business model: management itself, organizational structure, technology, and co-creation with external parties. It discusses the individual effects of these levers on business model replication and renewal. It also analyses specific combinations that strengthen business model innovation, including those which are technology oriented, internally oriented, externally oriented, and those which combine all of the levers in an integrated way.

Switch On Your Brain

How can great companies do everything right - identify real customer needs, deliver excellent innovations, beat their competitors to market - and still fail? The sad truth is that many companies fail because they focus too intensely on their own innovations, and then neglect the innovation ecosystems on which their success depends. In our increasingly interdependent world, winning requires more than just delivering on your own promises. It means ensuring that a host of partners -some visible, some hidden- deliver on their promises, too. In The

whopping 75-98 percent--of the illnesses that plague us today are a direct result of our thought life. What we think about truly affects us both physically and emotionally. In fact, fear alone triggers more than 1,400 known physical and chemical responses in our bodies, activating more than thirty different hormones! Today our culture is undergoing an epidemic of toxic thoughts that, left unchecked, create ideal conditions for illnesses. Supported by current scientific and medical research, Dr. Caroline Leaf gives readers a prescription for better health and wholeness through correct thinking patterns, declaring that we are not victims of our biology. She shares with readers the "switch" in our brains that enables us to live happier, healthier, more enjoyable lives where we achieve our goals, maintain our weight, and even become more intelligent. She shows us how to choose life, get our minds under control, and reap the benefits of a detoxed thought life.

Strategic Brand Management

The tenth annual Advertising and Consumer Psychology Conference held in San Francisco focused on branding -- a subject generating intense interest both in academia and in the "real world." The principle theory behind these conferences is that much can be gained by joining advertising and marketing professionals with academic researchers in advertising. Professionals can gain insight into the new theories, measurement tools and empirical findings that are emerging, while academics are stimulated by the insights and experience that

Online Library Strategic Brand Management Keller 4th Edition

professionals describe and the research questions that they pose. This book consists of papers delivered by experts from academia and industry discussing issues regarding the role of advertising in the establishment and maintenance of brand equity -- making this volume of interest to advertising and marketing specialists, as well as consumer and social psychologists.

Marketing Management, Global Edition

Adopted internationally by business schools and MBA programmes, The New Strategic Brand Management is simply the reference source for senior strategists, positioning professionals and postgraduate students. Over the years it has not only established a reputation as one of the leading works on brand strategy, but also has become synonymous with the topic itself. Using an array of international case studies, Jean-Noël Kapferer covers all the leading issues faced by brand strategists today. With both gravitas and intelligent insight, the book reveals new thinking on topics such as putting culture and content into brands, the impact of private labels and the comeback of local brands. This updated fifth edition of The New Strategic Brand Management builds on its impressive reputation, including new information to enable students and practitioners to stay up to date with targeting, adding recent research and market knowledge to the discipline. With dedicated sections for specific types of brands (luxury, corporate and retail), international examples and case studies from companies such as Audi, Nivea, Toyota and Absolut
