Disruptive behavior in the classroom, poor academic performance, out-of-control emotions: if you work with adolescents, you are well-aware of the challenges this age group presents. What if there was a way to calm these students down and arm them with the mindfulness skills needed to really excel in school and life? Written by mindfulness expert and licensed clinical psychologist Patricia C. Broderick, Learning to Breathe is a secular program that tailors the teaching of mindfulness to the developmental needs of adolescents to help them understand their thoughts and feelings and manage distressing emotions. Students will be empowered by learning important mindfulness meditation skills that help them improve emotion regulation, reduce stress, improve overall performance, and, perhaps most importantly, develop their attention. The book also includes a website link with student handouts and homework assignments, making it an ideal classroom tool. The book integrates certain themes of mindfulness-based stress reduction (MBSR), developed by Jon Kabat-Zinn, into a program that is shorter, more accessible to

students, and compatible with school curricula. Students will learn to pay attention in the moment, manage emotions as they are perceived, and gain greater control over their own feelings and actions. These mindfulness practices offer the opportunity to develop hardiness in the face of uncomfortable feelings that otherwise might provoke a response that could be harmful (e.g. acting out by taking drugs, displaying violent behavior or acting in by becoming more depressed). This easy-to-use manual is designed to be used by teachers, but can also be used by any mental health provider teaching adolescents emotion regulation, stress reduction and mindfulness skills. The author is a graduate of the MBSR advanced practicum at the Center for Mindfulness in Massachusetts, led by Jon Kabat-Zinn. She is also a clinical psychologist and a certified school psychologist and counselor for grades K-12. In the book, Broderick calls on her years of experience working with adolescents to outline the best strategies for dealing with disruption in the classroom and emotions that are out of hand. The book is structured around six themes built upon the acronym BREATHE, and each theme has a core message. The program allows for themes to be delivered in 6 longer or 18 shorter sessions, depending upon time and needs of students. The 6 core lessons are: Body, Reflection, Emotions, Attention, Tenderness, and Healthy Mind Habits. Learning to Breathe is the perfect tool for empowering students as they grapple with the psychological tasks of adolescence.

Blended (also called hybrid) classrooms, in which face-to-face interaction is intentionally combined with online activities to aid student learning, are becoming more and more common. Most recently, “flipped” classrooms have become a popular method for teaching because more time for active learning in-class can be gained by moving content delivery such as lecture to outside-of-class homework using technology tools such as video or lecture capture. The blended model is proving to be an environment that provides more self-directed, technology-mediated learning experiences for students who will be incorporating technology more and more into their professional lives post-college. The Blended Course Design Workbook meets the need for a user-friendly resource that provides faculty members and administrators with instructions, activities, tools, templates, and deadlines to guide them through the process of revising their traditional face-to-face course into a blended format. Providing a step-by-step course design process that emphasizes active learning and student engagement, this book will help instructors adapt traditional face-to-face courses to a blended environment by guiding them through the development of course goals and learning objectives, assignments, assessments, and student support mechanisms with technology integration in mind. It will also help instructors choose the right technologies based on an instructor’s comfort level with technology and their specific pedagogical needs. The book will help each instructor who uses the text to develop a unique course by making choices about their course design based on student learning needs for their chosen topic and discipline. Every component of the workbook has been piloted with faculty designing and implementing blended courses and then revised to better meet the needs of faculty across a range of comfort levels with technology use. The Blended Course Design Workbook includes detailed instructions for each stage of course design alongside specific activities that the reader can complete. The book is unique because it facilitates a step-by-step process for blended course design with specific templates and tools that can be used across disciplines. Additional resources and handouts are posted on the book page as well as the author website, a <http://www.bcdworkbook.com> www.bcdworkbook.com.

The purpose of Mel Bay's Fill Workbook is to expand the players' fill vocabulary by helping drummers create short fills. This is a flexible workbook that can be used by beginning and intermediate students and the more advanced drummer. Most playing situations are more about performing songs than solos, and for the drummer this means not only playing grooves, but also helping to cue the band into the various sections as they change. This book is a tool to help the drummer find new ways of playing short fills to break away from the old favorites. the examples in Fill Workbook are meant to be used as a starting point to initiate ideas and are written for a basic drum kit set-up. the book can easily be modified by the teacher or player to suit the individual drummer's level and for varying drum kit set ups. the accompanying CD contains 35 examples of 1/2 beat, 1 beat and 2 beat fills. the first 2 sections of the book are demonstrated as written on the CD.

Introduction to Computer Excel 7 for Office

John Reynolds Gardiner's classic action-packed adventure story about a thrilling dogsled race has captivated readers for more than thirty years. This middle grade novel is an excellent choice for tween readers in grades 5 to 6, especially during homeschooling. It's a fun way to keep your child entertained and engaged while not in the classroom. Based on a Rocky Mountain legend, Stone Fox tells the story of Little Willy, who lives with his grandfather in Wyoming. When Grandfather falls ill, he is no longer able to work the farm, which is in danger of foreclosure. Little Willy is determined to win the National Dogsled Race—the prize money would save the farm and his grandfather. But he isn't the only one who desperately wants to win. Willy and his brave dog Searchlight must face off against experienced racers, including a Native American man named Stone Fox, who has never lost a race. Exciting and heartwarming, this novel has sold millions of copies and was named a New York Times Outstanding Children's Book.

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack

of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.
