Teaching at Its Best

Everything matters when it comes to teaching and learning: student characteristics, the school itself, and cultural ideas about the value of higher education, to name a few. Most of these influences are outside the college instructor's control. Other issues, however -- such as a course's intellectual demands, type of feedback students receive, the instructional methods, and the relationship that connects professor to student -- are controllable. This book examines the many choices professors make about their teaching, beginning with their initial planning of the course and its basic content through to the final decisions about grades and assessing effectiveness. Chapters address the following topics: Planning Lecturing Leading discussions Student-centered teaching methods such as collaborative or experiential activities Testing and grading Helping students through feedback and guidance Managing classroom dynamics Using technology effectively Evaluating and documenting one's contributions as a teacher Brief research analyses show why certain techniques work better than others. Through lively examples and prompts to continually personalize the material, readers learn how to structure their teaching and what to do to ensure their students are treated fairly. This book is for beginning instructors as well as those who have been teaching at the college level for many years. Author Donelson Forsyth calls readers' attention to basics such as the cognitive, motivational, personal, and interpersonal processes flowing through even the most routine of educational experiences. He also addresses online teaching, instructional design, learning teams, and new technologies to help professors re-examine and refresh their existing practices.

In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

America is facing a higher education bubble. Like the housing bubble, it is the product of cheap credit coupled with popular expectations of ever-increasing returns on investment, and as with housing prices, the cheap credit has caused college tuitions to vastly outpace inflation and family incomes. Now this bubble is bursting. In this Broadside, Glenn Harlan Reynolds explains the causes and effects of this bubble and the steps colleges and universities must take to ensure their survival. Many graduates are unable to secure employment sufficient to pay off their loans, which are usually not dischargeable in bankruptcy. As students become less willing to incur debt for education, colleges and universities will have to adapt to a new world of cost pressures and declining public support.

"Indian Education for All explains why teachers and schools need to privilege Indigenous knowledge and explicitly integrate decolonization concepts into learning and teaching to address the academic gaps in Native education. The aim of the book is to help teacher educators, school administrators, and policy-makers engage in productive and authentic conversations with tribal communities about

what Indigenous education reform should entail"--

Winner of the Virginia and Warren Stone Prize awarded annually by Harvard University Press for an outstanding book on education and society What makes a great teacher great? Who are the professors students remember long after graduation? This book, the conclusion of a fifteen-year study of nearly one hundred college teachers in a wide variety of fields and universities, offers valuable answers for all educators. The short answer is—it's not what teachers do, it's what they understand. Lesson plans and lecture notes matter less than the special way teachers comprehend the subject and value human learning. Whether historians or physicists, in El Paso or St. Paul, the best teachers know their subjects inside and out—but they also know how to engage and challenge students and to provoke impassioned responses. Most of all, they believe two things fervently: that teaching matters and that students can learn.

Teacher's Edition for American Government: Stories of a Nation

Introduction to Teaching

"Every teacher, every student of history, every citizen should read this book. It is both a refreshing antidote to what has passed for history in our educational system and a one-volume education in itself." —Howard Zinn A new edition of the national bestseller and American Book Award winner, with a new preface by the author Since its first publication in 1995, Lies My Teacher Told Me has become one of the most important—and successful—history books of our time. Having sold nearly two million copies, the book also won an American Book Award and the Oliver Cromwell

Cox Award for Distinguished Anti-Racist Scholarship and was heralded on the front page of the New York Times. For this new edition, Loewen has added a new preface that shows how inadequate history courses in high school help produce adult Americans who think Donald Trump can solve their problems, and calls out academic historians for abandoning the concept of truth in a misguided effort to be “objective.” What started out as a survey of the twelve leading American history textbooks has ended up being what the San Francisco Chronicle calls “an extremely convincing plea for truth in education.” In *Lies My Teacher Told Me*, James W. Loewen brings history alive in all its complexity and ambiguity. Beginning with pre-Columbian history and ranging over characters and events as diverse as Reconstruction, Helen Keller, the first Thanksgiving, the My Lai massacre, 9/11, and the Iraq War, Loewen offers an eye-opening critique of existing textbooks, and a wonderful retelling of American history as it should—and could—be taught to American students.

Combining the brevity of a streamlined Introduction to Education text with the support package of a much more expensive book, the brief edition of *Teachers, Schools, and Society* encourages experienced instructors to explore their own creativity while ensuring that newer faculty can teach the course with confidence. David Sadker's and Karen Zittleman's lively writing style captures the joys and challenges of teaching. The text stresses the importance of fairness and justice in school and society, focuses on the most crucial topic areas, and integrates the most current issues in education. In addition, the wealth of activities included--from online video observations to portfolio-building exercises--offers a broad range of ways to introduce students to the teaching profession.

The Blind Side: Evolution of a Game

Using empirical research, *Effective College and University Teaching: Strategies and Tactics for the New Professoriate* gives faculty and graduate teaching assistants the tools for understanding why certain teaching practices work and how to adjust their teaching to changing classroom room and online environments. The majority of books on college and university teaching are “how to” books. This book takes a unique approach and provides both the rationale and a detailed guide for how to use and teach these practices to others. Written by leading scholars and expert master teachers, this book outlines, reviews, and discusses the best practices for preparing graduate students to become effective in their duties as teaching assistants and as teachers of record and for new faculty teaching earlier in their careers. The book provides full coverage of those topics central to developing efficacious training practices aimed at the professional development of teachers at the college and university level.

Overcoming textbook fatigue means reaching within and beyond the textbook to access all sorts of 21st century tools, the same ones that students will be using in college, careers, and daily life. -ReLeah Cossett Lent Textbook fatigue is a malaise

that negatively affects teachers and students. It is the result of scripted programs and step-by-step teachers' manuals that dismiss the individualization of schools, teachers, and students. Because textbooks provide a one-way distillation of information aimed at a broad, generic population, they offer little to engage or pique the interest of the 30 individuals in a classroom. In this example-packed book, ReLeah Cossett Lent shows how educators can reclaim the curriculum by shifting the textbook from sole source to resource. She also gives advice on using Common Core State Standards throughout the school and in the classroom. Teachers, coaches, curriculum coordinators, and administrators will discover proven techniques that will revitalize teaching and learning in every content area: *Discipline-specific writing activities that extend and deepen lessons. *Strategies for using content-specific materials that encourage students to "read to learn." *Effective vocabulary strategies that work throughout the curriculum. *Methods to tap into and build background knowledge. *Fun activities that use relevant life skills to involve and engage students in learning. Lent highlights what's to be gained from loosening the grip on textbooks and provides practical guidance on how to accomplish that goal, using real-life examples from schools that have made the change. *Overcoming Textbook Fatigue* is brimming with ideas to restore the joy of teaching and learning and, in the process, boost student achievement. Lent is a 20-year teaching veteran, an award-winning author, and an experienced international consultant specializing in literacy and communities of practice.

#1 NEW YORK TIMES BESTSELLER • ONE OF ESSENCE'S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS In this iconic memoir of his early days, Barack Obama "guides us straight to the intersection of the most serious questions of identity, class, and race" (The Washington Post Book World). "Quite extraordinary."—Toni Morrison In this lyrical, unsentimental, and compelling memoir, the son of a black African father and a white American mother searches for a workable meaning to his life as a black American. It begins in New York, where Barack Obama learns that his father—a figure he knows more as a myth than as a man—has been killed in a car accident. This sudden death inspires an emotional odyssey—first to a small town in Kansas, from which he retraces the migration of his mother's family to Hawaii, and then to Kenya, where he meets the African side of his family, confronts the bitter truth of his father's life, and at last reconciles his divided inheritance. Praise for *Dreams from My Father* "Beautifully crafted . . . moving and candid . . . This book belongs on the shelf beside works like James McBride's *The Color of Water* and Gregory Howard Williams's *Life on the Color Line* as a tale of living astride America's racial categories."—Scott Turow "Provocative . . . Persuasively describes the phenomenon of belonging to two different worlds, and thus belonging to neither."—The New York Times Book Review "Obama's writing is incisive yet forgiving. This is a book worth savoring."—Alex Kotlowitz, author of *There Are No Children Here* "One of the most powerful books of self-discovery I've ever read, all the more so for its illuminating insights into the problems not only of race, class, and color, but of culture and ethnicity. It is also beautifully written, skillfully layered, and paced like a good

novel.”—Charlayne Hunter-Gault, author of *In My Place* “Dreams from My Father is an exquisite, sensitive study of this wonderful young author’s journey into adulthood, his search for community and his place in it, his quest for an understanding of his roots, and his discovery of the poetry of human life. Perceptive and wise, this book will tell you something about yourself whether you are black or white.”—Marian Wright Edelman
