Research in Personnel and Human Resources Management

A conceptual view of citation indexing; A historical view of citation indexing; The design and production of a citation index; The application of citation indexing to the patent literature; The citation index as a search tool; A science management tool; Citation analysis as a method of historical research into science; Mapping the structure of science; Citation analysis of scientific journals; Perspective on citation analysis of scientists.

Nanomaterials by Severe Plastic Deformation: NanoSPD5

Mixed Methods and Credibility of Evidence in Evaluation

Mixed methods in evaluation have the potential to enhance the credibility of evaluation and the outcomes of evaluation. This issue explores advances in understanding mixed methods in philosophical, theoretical, and methodological terms and presents specific illustrations of the application of these concepts in evaluation practice. Leading thinkers in the mixed methods evaluation community

provide frameworks and strategies that are associated with improving the probability of reaching the goals of enhanced credibility for evaluations, the evidence they produce, and the actions taken as a result of the evaluation findings. This is the 138th volume of the Jossey-Bass quarterly report series *New Directions for Evaluation*, an official publication of the American Evaluation Association.

Journal of Mechanical Design

Environmentally Friendly Polymer Nanocomposites

The 2018 MDPI Writing Prize invited early stage researchers who are not native English speakers to write on the subject of "the global benefits of open research". Six prizes were awarded, however there were many more entries. This book collates many of those entries and contains inspiring, thought-provoking and original viewpoints of open science through the eyes of those conducting research on a daily basis

How to Write and Publish a Scientific Research Paper

African scholarly research is relatively invisible globally because even though

research production on the continent is growing in absolute terms, it is falling in comparative terms. In addition, traditional metrics of visibility, such as the Impact Factor, fail to make legible all African scholarly production. Many African universities also do not take a strategic approach to scholarly communication to broaden the reach of their scholars' work. To address this challenge, the Scholarly Communication in Africa Programme (SCAP) was established to help raise the visibility of African scholarship by mapping current research and communication practices in Southern African universities and by recommending and piloting technical and administrative innovations based on open access dissemination principles. To do this, SCAP conducted extensive research in four faculties at the Universities of Botswana, Cape Town, Mauritius and Namibia.

Publishing Addiction Science

This comprehensive yet concise book provides a thorough and complete guide to every aspect of managing the peer review process for scientific journals. Until now, little information has been readily available on how this important facet of the journal publishing process should be conducted properly. *Peer Review and Manuscript Management in Scientific Journals* fills this gap and provides clear guidance on all aspects of peer review, from manuscript submission to final decision. *Peer Review and Manuscript Management in Scientific Journals* is an essential reference for science journal editors, editorial office staff and publishers.

It is an invaluable handbook for the set-up of new Editorial Offices, as well as a useful reference for well-established journals which may need guidance on a particular situation, or may want to review their current practices. Although intended primarily for journals in science, much of its content will be relevant to other scholarly areas. This wonderful work by Dr. Hames can be used as a textbook in courses for both experienced and novice editors, and I trust that it is what Dr. Hames intended when she prepared this beautiful book. Every scientific editor should read it. Journal of Educational Evaluation for Health Professionals, 2008 This book is co-published with the Association of Learned and Professional Society Publishers (ALPSP) (www.alpsp.org) ALPSP members are entitled to a 30% discount on this book.

The Evaluation of Research by Scientometric Indicators

Seeking Impact and Visibility

This book is written for members of the scholarly research community, and for persons involved in research evaluation and research policy. More specifically, it is directed towards the following four main groups of readers: – All scientists and scholars who have been or will be subjected to a quantitative assessment of

research performance using citation analysis. – Research policy makers and managers who wish to become conversant with the basic features of citation analysis, and about its potentialities and limitations. – Members of peer review committees and other evaluators, who consider the use of citation analysis as a tool in their assessments. – Practitioners and students in the field of quantitative science and technology studies, informetrics, and library and information science. Citation analysis involves the construction and application of a series of indicators of the ‘impact’, ‘influence’ or ‘quality’ of scholarly work, derived from citation data, i.e. data on references cited in footnotes or bibliographies of scholarly research publications. Such indicators are applied both in the study of scholarly communication and in the assessment of research performance. The term ‘scholarly’ comprises all domains of science and scholarship, including not only those fields that are normally denoted as science – the natural and life sciences, mathematical and technical sciences – but also social sciences and humanities.

Citation Indexing, Its Theory and Application in Science, Technology, and Humanities

This book is open access under a CC BY 4.0 license. This volume contains peer-reviewed papers from the Fourth World Landslide Forum organized by the International Consortium on Landslides (ICL), the Global Promotion Committee of

the International Programme on Landslides (IPL), University of Ljubljana (UL) and Geological Survey of Slovenia in Ljubljana, Slovenia from May 29 to June 2, 2017. The complete collection of papers from the Forum is published in five full-color volumes. This first volume contains the following:

- Three forum lectures
- Background and Content of the Sendai Partnerships 2015–2025
- Contribution from the signatory organizations of the Sendai Partnerships
- Landslide Dynamics: ISDR-ICL Landslide Interactive Teaching Tools (LIT T)
- Progress of the World Report on Landslides (WRL)
- International Programme on Landslides (IPL): Objects, History and List of WCoE/IPL projects
- UNESCO-KU-ICL UNITIWIN Network supporting IPL
- Landslides: Journal of International Consortium on Landslides
- International Programme on Landslides (IPL): WCoEs and IPL Projects
- Landslides and Society

Prof. Kyoji Sassa is the Founding President of the International Consortium on Landslides (ICL). He is Executive Director of ICL and the Editor-in-Chief of International Journal Landslides since its foundation in 2004. Prof. Matjaž Mikoš is the Forum Chair of the Fourth World Landslide Forum. He is the Vice President of International Consortium on Landslides and President of the Slovenian National Platform for Disaster Risk Reduction. Prof. Yueping Yin is the President of the International Consortium on Landslides and the Chairman of the Committee of Geo-Hazards Prevention of China, and the Chief Geologist of Geo-Hazard Emergency Technology, Ministry of Land and Resources, P.R. China. IPL (International Programme on Landslides) is a programme of the ICL. The programme is managed by the IPL Global Promotion Committee including ICL and

ICL supporting organizations, UNESCO, WMO, FAO, UNISDR, UNU, ICSU, WFEO, IUGS and IUGG. The IPL contributes to the United Nations International Strategy for Disaster Reduction and the ISDR-ICL Sendai Partnerships 2015–2025.

The Clinical Practice of Drug Information

This volume contains works on Africa published during 2008.

Immunotherapy in Clinical Medicine, An Issue of Medical Clinics - E-Book

This is a theoretical and practical guide on how to undertake and navigate advanced research in the arts, humanities and social sciences.

Academy of Management Learning & Education

There's no faster or easier way to stay informed! The Year Book of Dermatology and Dermatologic Surgery brings you abstracts of articles carefully selected from more than 100 journals worldwide. Expert commentaries evaluate the clinical importance of each article and discuss its application to your practice.

Judging Research

Advances in Management Accounting

Aimed at academics, academic managers and administrators, professionals in scientometrics, information scientists and science policy makers at all levels. This book reviews the principles, methods and indicators of scientometric evaluation of information processes in science and assessment of the publication activity of individuals, teams, institutes and countries. It provides scientists, science officers, librarians and students with basic and advanced knowledge on evaluative scientometrics. Especially great stress is laid on the methods applicable in practice and on the clarification of quantitative aspects of impact of scientific publications measured by citation indicators. Written by a highly knowledgeable and well-respected scientist in the field Provides practical and realistic quantitative methods for evaluating scientific publication activities of individuals, teams, countries and journals Gives standardized descriptions and classification of the main categories of evaluative scientometrics

The Journal of Nuclear Medicine

The Future of the Academic Journal

Advancing Culture of Living with Landslides

This issue of Medical Clinics covers the latest updates in immunotherapeutics by the world-leading experts on the topic. Immunotherapeutic treatments are discussed in infectious diseases, rheumatologic and neurologic disorders, renal diseases, diabetes and more. Emerging immunotherapies are also covered in depth.

The History of the World Federation of Neurology

Research in Personnel and Human Resources Management is designed to promote theory and research on important substantive and methodological topics in the field of human resources management.

Chemical Information and Computation

Advances in Financial Economics Vol. 16 contains a set of empirical papers by a set of global scholars who examine corporate governance and market regulation from

a variety of perspectives.

Engineering Education and Management

Ecological Informatics is defined as the design and application of computational techniques for ecological analysis, synthesis, forecasting and management. The book provides an introduction to the scope, concepts and techniques of this newly emerging discipline. It illustrates numerous applications of Ecological Informatics for stream systems, river systems, freshwater lakes and marine systems as well as image recognition at micro and macro scale. Case studies focus on applications of artificial neural networks, genetic algorithms, fuzzy logic and adaptive agents to current ecological management issues such as toxic algal blooms, eutrophication, habitat degradation, conservation of biodiversity and sustainable fishery.

Advances in Financial Economics

This volume of Advances in Management Accounting explores a variety of current issues through rigorous academic research. Topics include the link between CEO compensation and the 2008 financial crisis, the association between performance-based pay and employee honesty, and more.

Peer Review and Manuscript Management in Scientific Journals

Publishing Addiction Science is a comprehensive guide for addiction scientists facing the complex process of contributing to scholarly journals. Written by an international group of addiction journal editors and their colleagues, it discusses how to write research articles and systematic reviews, choose a journal, respond to reviewers' reports, become a reviewer, and resolve the often difficult authorship, ethical and citation issues that arise in addiction science publishing. As a "Guide for the Perplexed," Publishing Addiction Science helps novice as well as experienced researchers to deal with these challenges. It is suitable for university courses and forms the basis of the training workshops offered by the International Society of Addiction Journal Editors (ISAJE). Co-sponsored by ISAJE and the scientific journal Addiction, the third edition of Publishing Addiction Science gives special attention to the challenges faced by researchers from developing and non-English-speaking countries and features new chapters on guidance for clinician-scientists and the growth of infrastructure and career opportunities in addiction science.

Ecological Informatics

The world of the academic journal continues to be one of radical change. A follow-up volume to the first edition of The Future of the Academic Journal, this book is a

significant contribution to the debates around the future of journals publishing. The book takes an international perspective and looks ahead at how the industry will continue to develop over the next few years. With contributions from leading academics and industry professionals, the book provides a reliable and impartial view of this fast-changing area. The book includes various discussions on the future of journals, including the influence of business models and the growth of journals publishing, open access and academic libraries, as well as journals published in Asia, Africa and South America. looks at a fast moving and vital area for academics and publishers contains contributions from leading international figures from universities and publishers

Journal of Vertebrate Paleontology

Searcher

This report indicates that the oversight of research integrity in the UK is unsatisfactory. The Science and Technology Committee concludes that in order to allow others to repeat and build on experiments, researchers should aim for the gold standard of making their data fully disclosed and made publicly available. The report examines the current peer-review system as used in scientific publications

and the related issues of research impact, data management, publication ethics and research integrity. The UK does not seem to have an oversight body for research integrity covering advice and assurance functions across all disciplines and the Committee recommends the creation of an external regulator. It also says all UK research institutions should have a specific member of staff leading on research integrity. The report highlights concerns about the use of journal Impact Factor as a proxy measure for the quality of research or of individual articles. Innovative ways to improve current pre-publication peer-review practices are highlighted in the report, including the use of pre-print servers, open peer review, increased transparency and online repository-style journals. The growth of post-publication peer review and commentary also represents an enormous opportunity for experimentation with new media and social networking tools, which the Committee encourages. There should also be greater recognition of the work-sometimes considered to be a burden-carried out by reviewers, by both publishers and employers. In order to do this, publishers need to have in place systems for recording and acknowledging the contribution of those involved in peer review.

Peer Review in Scientific Publications

The LTLGB 2012 conference is intended to bring together researchers and related government officials involved in low carbon transportation, low carbon logistics and green building, industrial practitioners to present, discuss and exchange ideas,

results and experiences in the area of low carbon transportation, low carbon logistics and green building and interdisciplinary applications.

This is the proceedings of the selected papers presented at 2011 International Conference on Engineering Education and Management (ICEEM2011) held in Guangzhou, China, during November 18-20, 2011. ICEEM2011 is one of the most important conferences in the field of Engineering Education and Management and is co-organized by Guangzhou University, The University of New South Wales, Zhejiang University and Xi'an Jiaotong University. The conference aims to provide a high-level international forum for scientists, engineers, and students to present their new advances and research results in the field of Engineering Education and Management. This volume comprises 122 papers selected from over 400 papers originally submitted by universities and industrial concerns all over the world. The papers specifically cover the topics of Management Science and Engineering, Engineering Education and Training, Project/Engineering Management, and Other related topics. All of the papers were peer-reviewed by selected experts. The

papers have been selected for this volume because of their quality and their relevancy to the topic. This volume will provide readers with a broad overview of the latest advances in the field of Engineering Education and Management. It will also constitute a valuable reference work for researchers in the fields of Engineering Education and Management.

The Global Benefits of Open Research

Year Book of Dermatology and Dermatological Surgery 2011 - E-Book

The 2019 MPDI Writing Prize invited early stage researchers who are not native English speakers to write on the subject of "how research should be evaluated and how researchers should be rewarded". Six prizes were awarded, however there were many more entries. This book collates many of those entries and contains inspiring, thought-provoking and original viewpoints of open science through the eyes of those conducting research on a daily basis.

Introduction to Research Methods in Psychology

Download Ebook Thomson Reuters Journal Impact Factor List 2012

Comprehensive, straightforward and clear, Introduction to Research Methods in Psychology, 3rd edition is the essential student guide to understanding and undertaking quantitative and qualitative research in psychology. Updated throughout to include new topics such as the latest developments in online support for conducting research and data management, this new edition continues to provide a thorough, accessible and up to date coverage of the field. The book is supported by a companion website featuring a range of resources to help students check and further their understanding of the subject. Visit www.pearsoned.co.uk/howitt to find out more. "Howitt and Cramer's Introduction to Research Methods (Third Edition) offers the clearest and most comprehensive coverage of research methods for first year psychology students on the market. Indeed, it is a priceless source of advice and information on research design for students throughout their undergraduate career, and even into postgraduate study." Ronnie Wilson, University of Ulster

Pacific Conservation Biology

Year Book of Dermatology and Dermatological Surgery 2011 - E-Book

LTLGB 2012

Library Issues

Concerns about global warming and the depletion of oil reserves have led to significant research into more sustainable composite materials made from natural materials. Recently, research has focussed on the development of nanoscale reinforcements for this new group of composites, significantly improving and extending their range of desirable properties. Environmentally friendly polymer nanocomposites summarises this wealth of research and its practical implications. After an introduction to the subject, part one looks at matrix and reinforcement materials as well as their characterisation. Part two reviews key properties such as tensile and dynamic mechanical properties and thermal stability. It also considers issues such as barrier properties, biodegradability, rheology, electrical and thermal conductivity. The book concludes by reviewing potential applications. This book is ideal for polymer and material scientists, researchers and engineers. It will also help industrial researchers and R&D managers who want to bring advanced eco-friendly polymer composite-based products into the market. Summarises the practical implications of the development of nanoscale reinforcements for sustainable composite materials made from natural materials Examines matrix and reinforcement materials and their characterisation and reviews key properties such as tensile and dynamic mechanical properties Considers barrier properties, biodegradability, rheology, electrical and thermal conductivity and potential applications

Nursing and Midwifery Research

Journal of Sport & Exercise Psychology

"This resource will educate students and pharmacists on traditional drug information topics while providing an extensive background on more recent practice areas. This is a user-friendly text with multiple examples that can be used in education and training, as well as clinical practice. Each chapter includes learning objectives, key terms, examples and cases, and review questions"--

Year Book of Dermatology and Dermatological Surgery 2012 - E-Book

The new edition upholds the premise that knowledge about research process and design is mandatory in today's health care arena, and that all nurses and midwives need to understand research findings and their implication for changing practice. It is completely revised with many new chapters. The text has been restructured into three sections. Section 1 Research Awareness sets the scene for the importance of nursing and midwifery research and provides an overview of research theory and practice as processes. Chapters on searching for and reviewing the literature

provide detailed advice for undergraduates and facilitate access to research articles online. One of the new chapters discusses ethical issues in Australia and New Zealand. Section 2 Appreciation and Application provides a detailed discussion of qualitative, quantitative and mixed methods research approaches with many useful examples from the clinical area. Section 3 Conducting primary research is new and is designed to accommodate both undergraduate and postgraduate students in their research effort. Writing research proposals may be a requirement for undergraduates in their research program and postgraduates will find the information useful for undertaking a higher degree or applying for university or external funding. This final Section is also useful as a guide on disseminating and publishing conducted research findings. Combined Australian and New Zealand editorship ensures greater trans-Tasman coverage, awareness and relevance. Contributions from international luminaries are balanced by a heightened focus on research conducted within Australia and New Zealand. New edition conscientiously recognises midwifery research as related to but independent from nursing. The research process-driven approach is directed towards 'consumers' of research, and the comprehensive coverage extends from undergraduate through to a postgraduate level of knowledge. Expanded pedagogy includes Key Terms and Learning Outcomes at the beginning of each chapter; Icons throughout that direct readers to web-based material; Evidence-based Tips, Research in Brief boxes and Points to Ponder for constant reinforcement that links evidence to practice. Integrated Tutorial Triggers with suggested answers provided

and Multiple Choice Questions enable students to assess their understanding of key points. Evolve Website provides True/False questions and access to journal articles cited in the text, with additional reflective questions. Australian adaptation of Nursing Research: Lobiondo-Wood & Haber

21st Century Geography

Since its founding in 1957, the World Federation of Neurology (WFN) has been deeply integrated in the development of international collaboration in the field of neurology, and has played a key part in asserting with dissemination of information and the need to learn from each other, independent of political systems, but with a basis in the development of democracy worldwide. This book covers the history of the WFN from its founding in Brussels in 1957 to the present day. Written by a former President and long-standing officer of the WFN, The History of the World Federation of Neurology chronicles the formation and expansion of the WFN, the development of its structure and various committees, and the evolution of its global biennial meeting, the World Congress of Neurology. Sections of the text focus on the key neurologists involved in the development of the WFN, including Houston Merritt, Pearce Bailey Jr, and Ludo van Bogaert, to name but a few, as well as the history of its educational publications, including World Neurology and Journal of the Neurological Sciences.

Africa Bibliography 2008

Volume is indexed by Thomson Reuters CPCI-S (WoS). The 200 peer-reviewed articles in this "Nanomaterials by Severe Plastic Deformation" special collection are a convincing demonstration of the relevance of bulk ultrafine grained and nanostructured materials, produced by severe plastic deformation, to a wide range of researchers and engineers., The total number of articles in this edition, larger than that in the 2008 edition, shows that this community is, in fact, growing. The coverage includes all aspects of NanoSPD: Principles of SPD Processing, Microstructural Evolution and Grain Refinement, Mechanical Properties of SPD Materials, Functional and other Properties of SPD Materials, Innovation and Applications.
