The Navy Electricity and Electronics Training Series (NEETS) was developed for use by personnel in many electrical and electronic-related Navy ratings. Written by, and with the advice of, senior technicians in these ratings, this series provides beginners with fundamental electrical and electronic concepts through self-study. The presentation of this series is not oriented to any specific rating structure, but is divided into modules containing related information organized into traditional paths of instruction. The series is designed to give small amounts of information that can be easily digested before advancing further into the more complex material. For a student just becoming acquainted with electricity or electronics, it is highly recommended that the modules be studied in their suggested sequence.

This book surveys the entire field of body composition as it relates to performance. It includes a clear definition of terminology and a discussion of the various methods for measuring body composition. The authored papers represent a state-of-the-art review of this controversial field and address questions such as: What is a better measure of body composition--body fat or lean body mass? Does being overweight for one's height really affect performance? The book also addresses the issue of physical appearance as it relates to body fatness and performance. It includes an in-depth discussion of many of the topics of interest to those involved in sports medicine and exercise physiology.

After Eric Davis spent over 16 years in the military, including a decade in the SEAL Teams, his family was more than used to his absence on deployments and secret missions that could obscure his whereabouts for months at a time. Without a father figure in his own life since the age of fifteen, Eric was desperate to maintain the bonds he'd fought so hard to forge when his children were young—particularly with his son, Jason, because he knew how difficult it was to face the challenge of becoming a man on one's own. Unfortunately, Eric learned the hard way that Quality Time doesn't always show up in Quantity Time. Facebook, television, phones, video games, school, jobs, friends—they all got in the way of a real, meaningful father-son relationship. It was time to take action. As a SEAL, Eric learned to innovate and push boundaries, allowing him to function at levels beyond what was expected, comfortable, ordinary, and even imaginable, and he knew that as a father he needed to do the same with his son. Meeting extreme with extreme was the only answer. Using a unique blend of discipline, leadership, adventure, and grace, Eric and his SEAL brothers will teach you how to connect, and reconnect, with your sons and learn how to raise real men—the Navy SEAL way.

growth and avoid over-training in high-repetition and high-mileage running and fitness routines like those used by Navy SEALs. Pushing your fitness to the extremes is a necessary part of a rigorous regimen like Navy SEAL training. But for maximum results, it's crucial to incorporate a periodization program that creates a break from all the elements of your regular routine. Fitness is a journey, not a destination, and Navy SEAL Weight Training is the perfect guide to keeping you on the road to becoming fit and strong, Navy SEAL-style! The Navy SEAL Weight Training Workout has been specially designed for those who have a solid foundation of training under their belts and are looking for new ideas to add or replace their existing routines. The workouts incorporate weight training exercises, along with running, biking, or swimming and moderate repetitions of calisthenics for the ultimate recovery program built for boosting results. Based on actual Navy SEAL training routines, Special Ops Team Coach Stew Smith has developed The Navy SEAL Weight Training Workout to help keep you going strong, just like the Navy SEALs.

valuable works ever written on the efficacy of modern era amphibious warfare. While many students of military affairs have assumed that large-scale forcible entry amphibious operations are a thing of the past, the authors have done an outstanding job, in just eight concise and well-written chapters, to demonstrate how amphibious warfare, in combination with other joint operations, can prove decisive on modern-day battlefields. Covering a little-known combat operation that incredibly involved two neighboring North Atlantic Treaty Organization (NATO) allies--Greece and Turkey--the 1974 battle known in Turkey as Operation Star Drop-4 and erroneously in the West as Operation Attila, took place on the perpetually restive island nation of Cyprus. Moreover, the authors have finally brought to light what is "arguably only one of two such [amphibious] operations" fought since 1945 that involved a substantially opposed landing. The operation also included the heavy use of airborne, airmobile, naval surface, and other follow-on armored forces that proved decisive toward relative Turkish success on Cyprus in 1974"--

The book examines the evolution of American naval thinking in the post-Cold War era. It recounts the development of the U.S. Navy's key strategic documents from the fall of the Berlin Wall in 1989 to the release in 2007 of the U.S. Navy's maritime strategy, *A Cooperative Strategy for 21st Century Seapower*. An insightful and penetrating intellectual history, it critically analyzes the Navy's way of thinking and ideas, and recounts how they interacted with those that govern U.S. strategy to shape the course of U.S. naval strategy in the post-Cold War era. The book explains how the Navy arrived at its current strategic outlook and why it took nearly two decades for the Navy to develop a maritime strategy in an era in which the relative saliency of such should have been more apparent to Navy leaders. The author, a Navy captain, doesn't shy from taking to task the institution and its leaders for their narrow worldview and failure to understand the virtues and contributions of American sea power, particularly in an era of globalization. It describes the reasons behind the Navy's late development of a maritime strategy during the post-Cold War era. It recounts the origins and evolution of the Navy's distinctive way of thinking and ideas about sea power since before the Second World War, particularly how they shaped and

were shaped by the Navy's Cold War experiences. It argues that the Navy's way of thinking and ideas, and how they interacted those that governed U.S. strategy, bounded and channeled U.S. naval strategy away from a maritime approach as they had during the Cold War. It took an implausible series of events for one to emerge, including a losing war in Iraq—that called into question long-standing assumptions about U.S. strategy, threatened the Navy's relevance, and brought about a systemically oriented U.S. strategic approach—and the appearance of two maritime-minded Navy leaders. It focuses on the process by which the Navy developed its strategic documents, the process where institutional ideas are assembled, negotiated, and reshaped in light of other influences—i.e., the direction of U.S. strategy, budgetary constraints, perceived threats, and the competing interests of other domestic and institutional actors—because even though the subject is American naval thinking (and here it must be emphasized that the concept itself is somewhat metaphorical as only people can think), that is how real strategy is made.

Despite demonstrated prowess in the handling of ships and sailors, five years after receiving his commission, Jim Stavridis was planning on getting out of the Navy and going to law school. His assignments officer, a young lieutenant commander by the name of Mike Mullen (who would go on to become Chairman

of the Joint Chiefs) noticed something special in Stavridis, however, and convinced him to stay on active duty by dangling the prospect of Uncle Sam sending him to graduate school. Going ashore for a few years, Stavridis earned his MALD and PhD in international relations from the Fletcher School of Law and Diplomacy at Tufts University. The experience that taught him to look beyond the horizon and to think and act globally. Throughout his career Stavridis was anything but uniform in the way he approached his duties. An avid reader and prolific author he wrote more than 55 articles, commentaries, and book reviews in the Navy's professional journal "Proceedings" beginning when he was still a midshipman and continuing to this day. He has also written for some of the leading papers and journals in the United States, including the, New York Times, Washington Post, Atlantic Magazine, Naval War College Review, and many others His career was marked by unusually challenging assignments including command of a U.S. Navy guided missile destroyer in the early '90s; two stints as a top aide to two different Secretaries of the Navy (one a Republican and the other a Democrat); and command of an aircraft carrier battle group. Stavridis narrowly missed being killed on September 11, 2001 when an American Airlines aircraft plunged into the Pentagon not far from his office. He was subsequently put in charge of a Navy think tank, "Deep Blue," which was tasked with reimagining the service's role in a post-9/11 environment. Already selected for his first star as 9/11 unfolded, his rise through the ranks was swift - even going directly from one-star to three-star admiral without ever wearing two stars - when he was

selected to be the senior military assistant to the very demanding Secretary of Defense, Donald Rumsfeld. Surviving that crucible, he was nominated for his fourth star at the age of 50, one of the youngest persons to serve at that rank in modern history. He then became the first naval officer to lead the U.S. Southern Command - responsible for all U.S. military operations in the Caribbean and Central and South America. At the end of that assignment he was picked to be the first naval officer to serve as Supreme Allied Commander of NATO - a job first held by Dwight D. Eisenhower and then by a string of prominent generals. When he was given that assignment, the New York Times referred to Stavridis as a "renaissance Admiral," something Stavridis turned into "the accidental Admiral" given he was the first sailor to head to that command. That is where this book, "The Accidental Admiral" picks up - as Stavridis enlightens readers about securing such a position and serving as NATO's top man in uniform for four years. They were challenging years indeed. Stavridis was responsible for NATO operations in Afghanistan, its conduct of a military intervention in Libya and preparation for possible war in Syria - as well as worrying about the Balkans, cyber threats, piracy, all while cutting NATO by 30% due to budget reductions by the 28 nations of the Alliance. More than just describing the history of what happened, Stavridis shares with reader the "why" and gives insights into the personalities of those with whom he dealt, ranging from President Barack Obama; Secretary of State Hillary Clinton; Secretaries of Defense Robert Gates, Leon Panetta, and Chuck Hagel; Afghan President Hamid Karzai; Generals David Petraeus,

Stanley McChrystal, John Allen and many more. The Accidental Admiral is more than just a memoir. The book is also a very personal reflection of the burdens and benefits of leadership, and Stavridis also shares his insights on strategic communications, planning, and the convergence of threats that will confront the U.S. and its allies in the near future.
