'I am not a good man. I am not a bad man. In seven days I will be dead. My name is Peter Crumb. This is what remains ' Peter Crumb is a man whose life has been derailed by a single, devastating act of violence in his past. Now, in what he intends to be his last week on Earth, he is determined to leave his mark upon humanity - randomly, unjustly, with infinite attention to detail. And Monday means murder Shatteringly well written, this is a car-crash-compelling description of a week in the hell inhabited by one splintered and savage soul - an unrehearsed and unputdownable Dr Jekyll and Mr Hyde for our times.

## **An Introduction to the Way of the Buddha**

They are the stories of her father: stories of travel, of poverty and of faith in God through every season in

life. In her first book, *God Signs & Dad Stories*, Christian author Paula Pettis memorializes the memory of her late dad, Russell Pettis, through collected stories of his life. The first section of the book chronicles Russell's upbringing in Wisconsin during the Great Depression, when poverty was prevalent but family love abounding, as well as his time spent sailing in the Merchant Marines during World War II and later in other branches. Paula presents a touching tribute to her father in the second half of the book, recalling the months spent caring for her aging parent in hospital ICUs and through countless doctor visits. Yet through prayer, support from loved ones and unexplainable signs from God, she created treasured moments with her earthly father that celebrated her Heavenly Father.

### **The Empress and the Acolyte**

A unique insight into the mind of one of the world's most extraordinary thinkers. Undoubtedly the most famous scientist on the planet and the very face of physics over the last half-century, Stephen Hawking is remarkable for many reasons. Not least because he has continued to strive to achieve so much while

being hamstrung by debilitating illness. He has demonstrated categorically that if you put your mind to it, you can achieve anything, no matter your physical state. Of course, it helps if you happen to possess a mind such as his. His work on black holes put him on the map, and he became globally famous for his *A Brief History of Time*, communicating the most difficult scientific ideas at a period when he'd lost the ability to speak. *How to Think Like Stephen Hawking* reveals the key motivations, desires and philosophies that make Hawking one of the world's most enduring talents. Studying how he overcame great adversity, fought his demons as well as his detractors and looked back to the origins of the universe, with quotes and passages by and about him, you too can learn to think like the man who claims he can think in eleven dimensions.

What you're reading right now is known as the "cover

copy," or "flap copy." This is where the 84,951 words of my latest book are cooked down to 350 words or less to capture your imagination/download. I pondered how to do that. Should I cut to the chase and reveal pivotal plot points like the one at the end of the book where the little girl on crutches points an accusing finger and shouts, "the killer is Mr. Porter"? No. I have too much respect for you as an intelligent consumer to attempt such an obvious ruse. But let's not play games here. You clicked your way to this page, so you either: A. Know who I am. B. Like the cool smoking jacket I'm wearing on the cover. Or: C. Thought this was a secret link to Ashley Madison. Is it a sequel to my autobiography *If Chins Could Kill: Confessions of a B Movie Actor*? Sadly, no, which made it much harder to write. Is it an "autobiographical novel"? Yes. I am the lead character in the story (coincidentally an actor), and I am a real person, and everything in the book actually happened - except for the stuff that didn't. The action revolves around my preparations for a pivotal role in the A-list relationship film, *Let's Make Love!* My Homeric attempt to break through the glass ceiling of B-grade genre fair is hampered by a vengeful studio executive and a production that becomes infected by something called the "B-movie virus" - symptoms of which include excessive use of cheesy special effects, slapstick, and projectile vomiting. From a violent fistfight with a Buddhist to a life-altering stint in federal prison, this novel has it all. And if the 84,951 words are too time-consuming, there are lots and lots of cool graphics - all of which have been upgraded to vibrant color since the first publication. I hope you enjoy the book - and if you learn anything at all about

making love, please share it with me! Regards, Bruce  
"Go Ahead and Call Me Ash" Campbell

There is a secret society that presides over every world. This society is so powerful that it can control a nation, strike fear into the bravest of men and bring turmoil onto the most unsuspecting of victims. . . . There is a dangerous society in Seoul that is plaguing Choi Yoori. Her world is turned upside down when she is told that she bears a strong resemblance to the "Queen of the Underworld," a notorious Underworld crime lord who died 3 years prior - the exact same time Yoori woke up with amnesia. The dangers of this new world is crashing in on her and Yoori's only grip on stability lies with the guidance from her crime lord boss and the secrets the Queen of the Underworld hid from her powerful society. Welcome to a world where "Gods" walk amongst humans. Where the heartless and vengeful are revered like Kings and Queens - and the weak, the distracted are punished without mercy. It is a cruel world and once you're in, the only exit is death.

This document provides five brief reports that address several quality control procedures under the auspices of the Calibration and Validation Element (CVE) within the Sea-viewing Wide Field-of-view Sensor (SeaWiFS)

Project. Chapter 1 describes analyses of the 32 sensor engineering telemetry streams. Anomalies in any of the values may impact sensor performance in direct or indirect ways. The analyses are primarily examinations of parameter time series combined with statistical methods such as auto- and cross-correlation functions. Chapter 2 describes how the various onboard (solar and lunar) and vicarious (in situ) calibration data will be analyzed to quantify sensor degradation, if present. The analyses also include methods for detecting the influence of charged particles on sensor performance such as might be expected in the South Atlantic Anomaly (SAA). Chapter 3 discusses the quality control of the ancillary environmental data that are routinely received from other agencies or projects which are used in the atmospheric correction algorithm (total ozone, surface wind velocity, and surface pressure; surface relative humidity is also obtained, but is not used in the initial operational algorithm). Chapter 4 explains the procedures for screening level-1, level-2, and level-3 products. These quality control operations incorporate both automated and interactive procedures which check for file format errors (all levels), navigation offsets (level-1), mask and flag performance (level-2), and product anomalies (all levels). Finally, Chapter 5 discusses the match-up data set development for comparing SeaWiFS level-2 derived products with in situ observations, as well as the subsequent outlier analyses that will be used for evaluating error sources. Anthropology and Art Practice takes an innovative look at new experimental work informed by the newly-reconfigured relationship between the arts and anthropology. This practice-based and visual work can be characterised as 'art-ethnography'. In engaging with the concerns of both fields, this cutting-edge study tackles current issues such as the role of the artist in collaborative work, and the political uses of documentary. The book focuses on key works from artists and anthropologists that engage with 'art-ethnography' and investigates the processes and strategies behind their creation and exhibition. The book highlights the work of a new generation of practitioners in this hybrid field, such as Anthony Luvera, Kathryn Ramey, Brad Butler and Karen Mizra, Kate Hennessy and Jennifer Deger, who work in a diverse range of media - including film, photography, sound and performance. Anthropology and Art Practice suggests a series of radical challenges to assumptions made on both sides of the art/anthropology divide and is intended to inspire further dialogue and provide essential reading for a wide range of students and practitioners.

Proactive Citizenry, the company which created Cam from the parts of unwound teens, has a plan: to mass produce Rewound teens like Cam for military purposes. But below the surface is of that horror lies another shocking level of intrigue: Proactive Citizenry has been suppressing technology that could make unwinding completely unnecessary. As Conner, Risa and Lev uncover these shocking secrets, enraged teens begin to march on Washington to demand justice and a better future. But more trouble is brewing. Starkey's group of storked teens are growing more powerful and militant with each new recruit. And if they have their way, they'll burn the harvest camps to the group, and put every adult in them before a firing squad-which could destroy any chance America has for a peaceful future. Praise for UNWIND: "This is the kind of rare book that makes the hairs on your neck rise up. It is written with a sense of drama that should get it instantly snapped up for film." The Times "Gripping, brilliantly imagined futuristic thriller... The issues raised could not be more provocative - the

sanctity of life, the meaning of being human - while the delivery could hardly be more engrossing or better aimed to teens." Publishers Weekly, starred review "a powerful, shocking, and intelligent novel It's wonderful, wonderful stuff." thebookbag.co.uk "This book challenges ones ideas about life, about morality, about religion, about fanatics. It is not a comfortable read but it is thought-provoking." Carousel
