Autocar & Motor

Boletín impositivo

Extensive coverage of the political, economic and social affairs of the region. In just one volume there is incisive analysis, invaluable statistical surveys and useful directory sections.

PISA-VET

The growing together of the European labour markets proves to be a genuine challenge for education, particularly for VET-systems. VET-systems have to provide future employees with the necessary qualifications that they are well equipped for flexibility, mobility and challenges of international cooperation on the labour market. If today's VET-systems are able to impart these key qualifications is unknown. Therefore, the German Government (BMWA) initiated a feasibility study on VET - modelled on the basis of PISA research studies. The concept of a PISA for vocational education and training presented in this book was developed by leading international experts in the field. It shows how a measuring of expertise and competence is actually possible. It describes the criteria to be used for the evaluation of training programs, and discusses how the efficiency of different learning places are to be evaluated. This study explores the conditions and processes necessary for an improvement of vocational education and training in the participating countries. It thereby provides a

significant contribution for the political debate, but also for the academic discussion, for instance on the establishing of a European system of VET.

Who's who in the Media

VW Polo Petrol & Diesel Service & Repair Manual

This manual covers VW Polo models with petrol and diesel engines.

The Power Report

A brand new guide to Who's Who in the media, researched and compiled by the team responsible for the Media Directory, this companion title contains in-depth profiles of the UK's top 1000 movers and shakers in the media industry..The most influential men and women in journalism, PR, marketing, newspapers, magazines, film, radio and TV give, in their own words, a thumbnail sketch of their career highlights, big breaks, mentors - and mistakes - as well as what they read, watch, listen to, and relax with..The guide also gives contact details, including phone numbers and email addresses.

Editor & publisher market guide, 2004

Essay from the year 2003 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 74% (A) entspricht 1,0, University of Teesside (Tesside Business School), course: Managing Markets, language: English, abstract: After the introduction of the first Volkswagen luxury car in May 2002, sales are still far behind the Volkswagen's expectation (Handelsblatt, 2003). It seems that the VW Phaeton faces the same destiny as its antique namesake Phaeton. In the Greek mythology, Phaeton was the son of Helios, the sun god. Helios has driven the family chariot across the sky, wearing the rays of the sun as a crown, lighting the day. One day Phaeton convinced his father to lend him the beautiful chariot. But Phaeton, in contrast to his father, was not able to drive the chariot appropriately, and drove the chariot so close to the earth that he boiled the oceans and scorched the land. So Zeus had to stop him by killing him with a lightning bolt (Vaughn, 2003). Volkswagen certainly had not considered this explanation when naming the Phaeton, but referred more likely to the second meaning of Phaeton; an elegant carriage of the 17th century which the owners drove on their own. Nevertheless, there are signs that the Volkswagen engagement in the high-class (luxury) car market is tougher than expected. It seems people are less persuadable to buy a high-quality car of the experienced and renowned German car manufacturer. This shows the divergence of the formerly targeted 12.000 to 15.000 units (Weernink, 2001) annually in global sales 2003 which is opposed by the actual numbers of only 2.600 units in Germany - the main market of the Phaeton - from January to October (Kraftfahrtbundesamt KBA) and estimated sales of 3500 units worldwide (Handelsblatt, 2003). The targeted sales of 20.000 units in 2004 (Weernink, 2003) seem to be completely unrealistic. But the Volkswagen top-management remained silent. Although Volkswagen always claims

After Karl Jöreskog's first presentation in 1970, Structural Equation Modelling or SEM has become a main statistical tool in many fields of science. It is the standard approach of factor analytic and causal modelling in such diverse fields as sociology, education, psychology, economics, management and medical sciences. In addition to an extension of its application area, Structural Equation Modelling also features a continual renewal and extension of its theoretical background. The sixteen contributions to this book, written by experts from many countries, present important new developments and interesting applications in Structural Equation Modelling. The book addresses methodologists and statisticians professionally dealing with Structural Equation Modelling to enhance their knowledge of the type of models covered and the technical problems involved in their formulation. In addition, the book offers applied researchers new ideas about the use of Structural Equation Modeling in solving their problems. Finally, methodologists, mathematicians and applied researchers alike are addressed, who simply want to update their knowledge of recent approaches in data analysis and mathematical modelling.
