Quick Guide to the Internet for Composition

Internet Information Services (IIS) 7.0 Administrator's Pocket Consultant

In their efforts to provide distance learners with the most effective services possible, librarians and information specialists are working more and more with faculty in academic departments, IT departments, and other librarians at cooperating institutions. Improving Internet Reference Services to Distance Learners chronicles how those efforts have seen librarians

become actively involved in online course management and delivery systems, particularly Blackboard, Desire2Learn, and WebCT, or by “embedding” themselves into the online course structure to better learn where students need assistance. This invaluable resource also examines how librarians use Internet resources to support professional and continuing education and to establish university-wide information and referral services to provide quality service to distance learners. Improving Internet Reference Services to Distance Learners encourages librarians to think more broadly about working with “outside” individuals when designing and providing reference and other services to nontraditional users. The book examines why it’s best to consider user needs, funding, staff management, and collaboration development when planning Internet reference services, how to develop and implement a required, credit-bearing online information literacy course, and how to apply effective marketing techniques from the business world to increase awareness of reference support services available to distance learners. It also offers a look at the Walden University Library at Indiana University-Bloomington, which “houses” no print collection—only online databases—and includes case studies that document the design and development of Internet reference services for the University of Illinois’ Fire Service Institute, and the efforts to provide support for doctor of pharmacy students at the University of Wisconsin-Madison in their final year of study. Improving Internet Reference Services to Distance Learners provides practical information on: monitoring online discussion threads devoted to library research Web-based interactive tutorials integrating library services in support of coursework integrating library services into online courses offering, promoting, and providing instruction to public users, as well as local and distance students developing a web site that centralizes information about library services and resources the potential of the academic library to be the central provider of information and referral services for an entire university Improving Internet Reference Services to Distance Learners is an invaluable resource for librarians working in academic, school, special, and public settings, and for library science faculty and students.

America Online For Dummies Quick Reference

CCNP Wireless (642-747 IUWMS) Quick Reference, 2nd Edition

Outstanding Academic Title from 2011 by Choice Magazine While newly arrived immigrants are often the focus of public concern and debate, many Mexican immigrants and Mexican Americans have resided in the United States for generations. Latinos are the largest and fastest-growing ethnic group in the United States, and their racial identities change with each generation. While the attainment of education and middle class occupations signals a decline in cultural attachment for some, socioeconomic mobility is not a cultural death-knell, as others are highly ethnically identified. There are a variety of ways that middle class Mexican Americans relate to their ethnic heritage, and racialization despite assimilation among a segment of the second and third generations reveals the continuing role of race even among the U.S.-born. Mexican Americans Across Generations investigates racial identity and assimilation in three-generation Mexican American families living in California. Through rich interviews with three generations of middle class Mexican American families, Vasquez focuses on the family as a key site for racial and gender identity formation, knowledge transmission, and incorporation processes, exploring how the racial identities of Mexican Americans both change and persist generationally in families. She illustrates how gender, physical appearance, parental teaching, historical era and discrimination influence Mexican Americans' racial identity and incorporation patterns, ultimately arguing that neither racial identity nor assimilation are straightforward progressions but, instead, develop unevenly and are influenced by family, society, and historical social movements.
